

Supplementary Figure 2. FT1 BRIG. From the inside to the outside, the rings correspond to the following strains: MDJK44, p1417, XN-04, ACCC400, LD120, L06, 220, A23, CRPJ-33, CM253, S10, 1AS2a, SJ1-7,2042, EN16, YINM, TFH56, EN27, EN23. D. FB2 BRIG. From the inside to the outside, the rings correspond to the following strains: SS1-1, S. nigra, NWU49, NWU339, D2-8, XY006, HSG2, SS52, SX6, 111WW2, MH60, SUK12, L2, MUSC, CH5-8, SBTS01, JA03, T44, SUK48, Am1. The outermost ring for both BRIGs represents unique genes annotated with KEGG for FT1 and FB2 strains related to PGP activities, respectively.
