
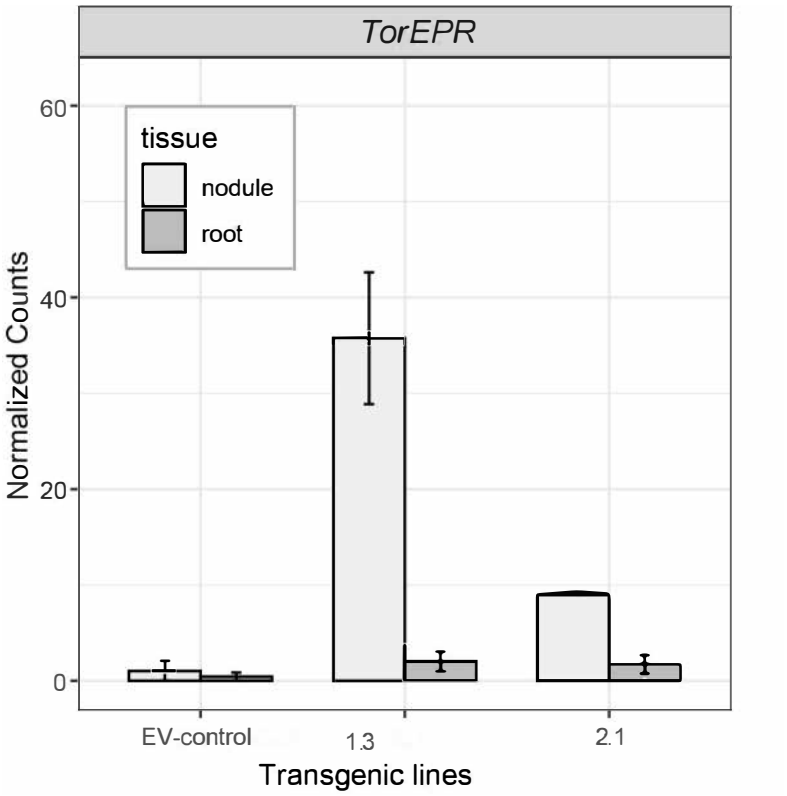

Figure S2: *TorEPR* is expressed in root nodules of transgenic *P. andersonii* lines. Expression of *T. orientalis pTorEPR:TorEPR* in nodules and roots of the *P. andersonii* transgenic lines 1.3 and 2.1, and the empty vector control (EV-control). Expression is given in DESeq2 normalized counts, error bars represent the standard error of two biological replicates. Nodule RNA was isolated x weeks post-inoculation with *Bradyrhizobium elkanii* WUR3.
