

This Supplementary Information file contains the available original Western blot images corresponding to the Western blot panels shown in the main figures.

Full-length blot images are provided for Fig. 3A and Fig. 5I. For the remaining Western blot panels, the available original cropped blot images retained from the experimental records are provided.

Molecular weight markers, target proteins, and the corresponding main figure panels are indicated where available. The cropped regions or bands corresponding to those shown in the main figures are indicated where applicable.

No selective image manipulation was performed. The Western blot images shown in the main figures were cropped for presentation. Any brightness or contrast adjustment, if applied, was performed uniformly across the entire image.

Category 1: Full-length blot images:

Category 2: Available original cropped blot images:

Figure 1J. Internal control.
(GAPDH 36kDa)

Figure 1J. Target protein.
(ZNF114 48kDa)

Figure 4C. Bax Target protein.
(Bax 21kDa)

Figure 4C. Bcl-2Target protein.
(Bcl-2 26kDa)
