Permission is granted to Scientific Reports of Springer Nature Ltd to publish both in print and digital under the CC BY 4.0 open access license the result of using KEGG and the following KEGG images in the article "Mechanistic Study of Deoxyshikonin-Mediated Protection Against High-Glucose-Induced Injury in HUVECs" written by chao Bai and colleagues:

- ECM-receptor interaction (map04512)
- Malaria (map05144)
- Axon guidance (map04360)
- Cell cycle (map04110)
- Protein digestion and absorption (map04974)
- p53 signaling pathway (map04115)
- Focal adhesion (map04510)
- AGE-RAGE signaling pathway in diabetic complications (map04933)
- Cell adhesion molecule (CAM) interaction (map04514)
- FoxO signaling pathway (map04068)
- Proteasome (map03050)
- Biosynthesis of amino acids (map01230)
- Ferroptosis (map04216)
- Hematopoietic cell lineage (map04640)
- Glutathione metabolism (map00480)
- Fructose and mannose metabolism (map00051)
- Fc gamma R-mediated phagosome formation (map04666)
- Rheumatoid arthritis (map05323)
- Fluid shear stress and atherosclerosis (map05418)
- Arachidonic acid metabolism (map00590)
