Supplement 1. Western blots

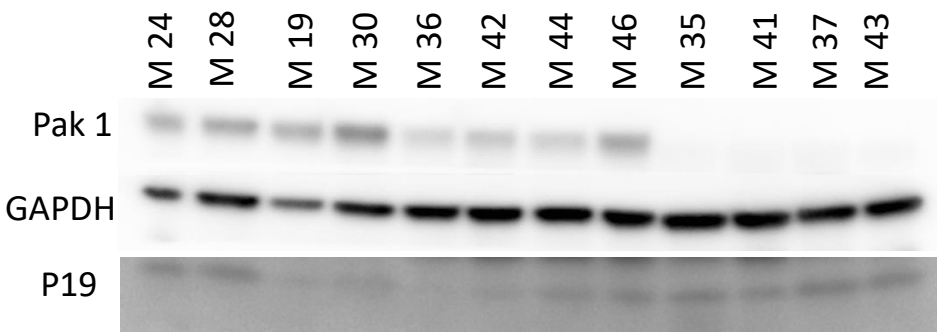

Figure 1.Membrane cut into 3 sections to blot for PAK1, GAPDH, and MLC-P19

Supplement 2. Western blots

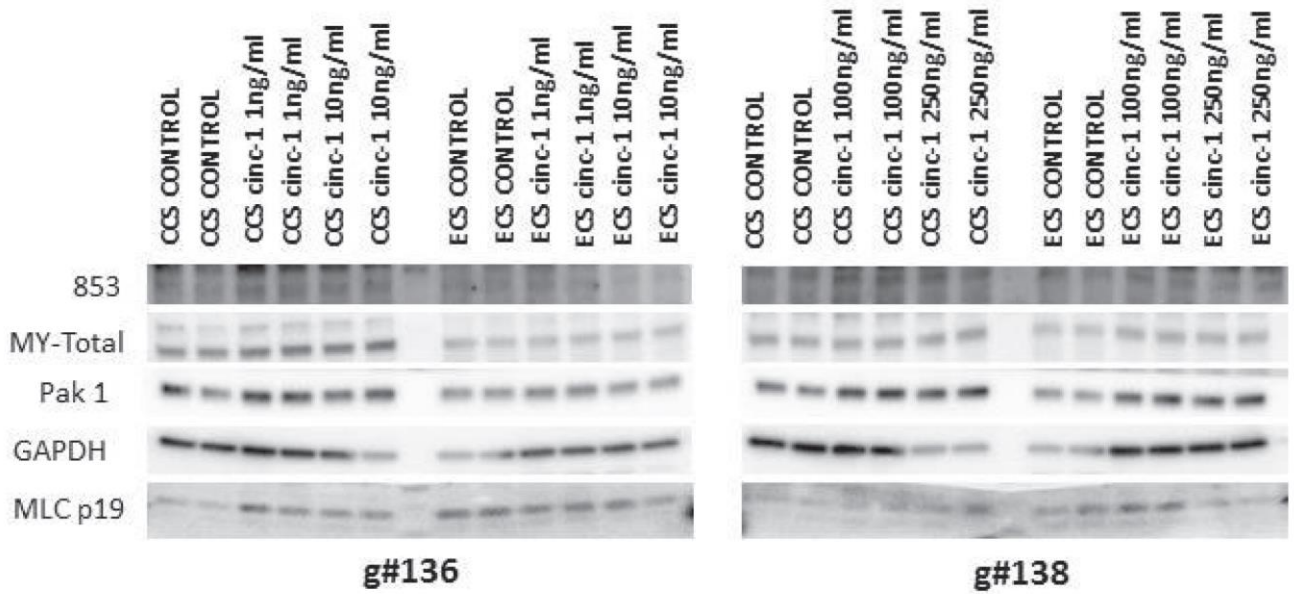

Figure 4A-B. Membrane cut into 5 sections to blot for different proteins.

Supplement 3. Western blots

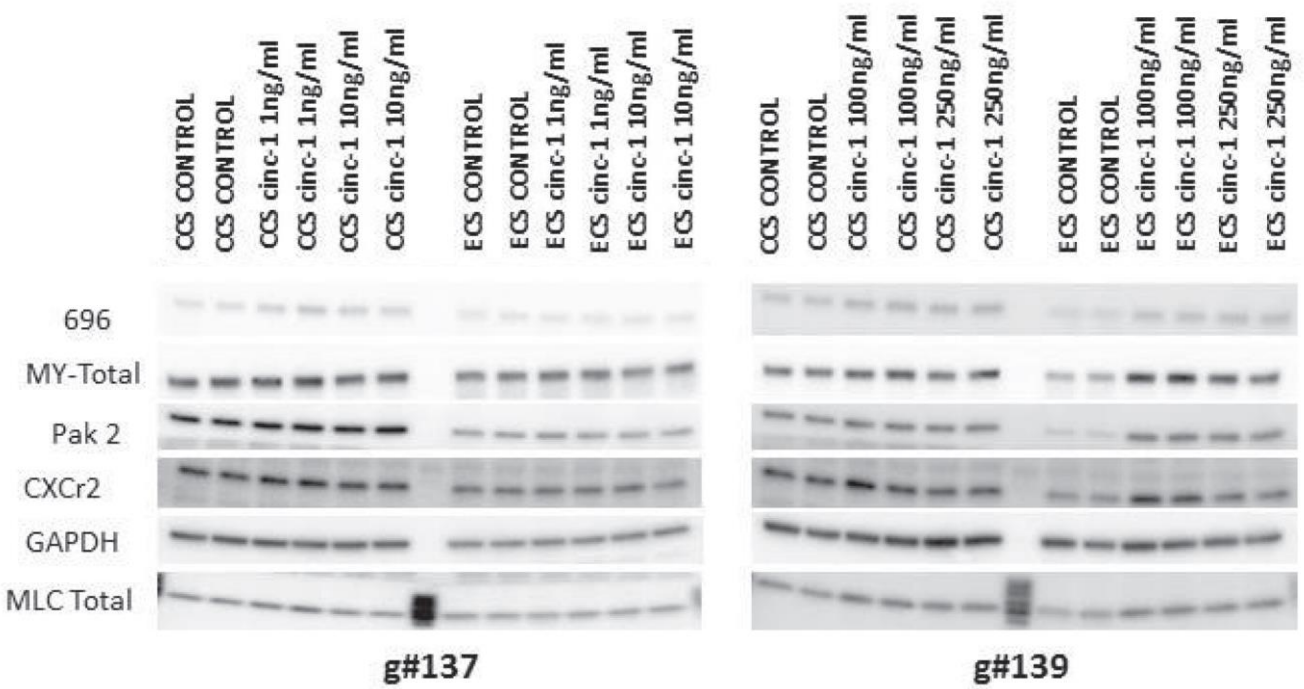

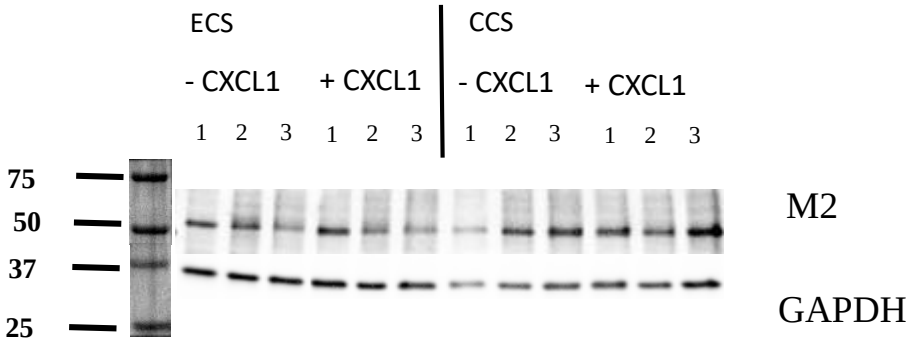

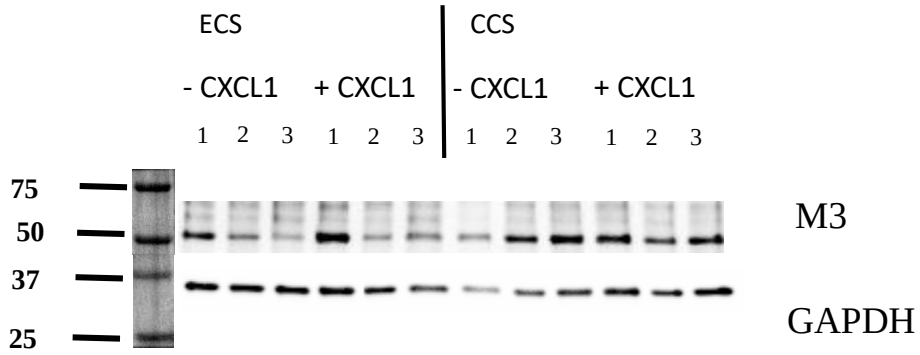

Figure 4C-D. Membrane cut into 6 sections to blot for different proteins. Only 100 ng CXCL1 treatment was quantified because there were not enough samples at the other doses.

Supplement 4. Western blots

Figure 4E-G

M2 Muscarinic receptor, gel cut into 2 strips to blot for M2 and GAPDH

M3 Muscarinic receptor, gel cut into 2 strips to blot for M3 and GAPDH
