

Code and Software Submission Checklist

Prior to submitting your work to Nature Research, we strongly recommend that you ask at least one colleague who is unfamiliar with your software to install the tool(s), follow the instructions, and provide feedback. This process will help ensure that reviewers will also be able to run your software.

You must submit all required content as a single zip file prior to peer review or provide a link where editors and reviewers can access all required content.

► Required content

- ☒ Compiled standalone software and/or source code
- ☒ A small (simulated or real) dataset to demo the software/code

A README file that includes:

1. System requirements

- ☒ All software dependencies and operating systems (including version numbers)
- ☒ Versions the software has been tested on
- ☒ Any required non-standard hardware

2. Installation guide

- ☒ Instructions
- ☒ Typical install time on a "normal" desktop computer

3. Demo

- ☒ Instructions to run on data
- ☒ Expected output
- ☒ Expected run time for demo on a "normal" desktop computer

4. Instructions for use

- ☒ How to run the software on your data
- ☐ (OPTIONAL) Reproduction instructions

We encourage you to include instructions for reproducing all the quantitative results in the manuscript.

► Additional information

Describe your software's license for use. We strongly recommend using a [license](#) approved by the [Open Source Initiative](#).

ColabFold is free open-source software (MIT) and available at <https://github.com/sokrypton/ColabFold>. A locally installable version (MIT) is available at <https://github.com/YoshitakaMo/localcolabfold>. The ColabFold development version shown in this manuscript is available at <https://github.com/konstin/ColabFold>. This version will shortly be integrated into the main repository. The ColabFold server components are free open-source software (GPLv3) and available at <https://github.com/soedinglab/mmseqs2-app>. MMseqs2 is free open-source software (GPLv3) and available at <https://mmseqs.com>.

Provide a link to the code in an open source repository (when available).

See above.

Your manuscript should include a complete, detailed description of the code's functionality (i.e. pseudocode).

Please indicate where this is found:

- ☐ Main text
- ☒ Methods section
- ☐ Elsewhere (specify):
