

Supplementary Figure 4.- PLS-DA (A) and clustering dendrogram analysis (B) on metabolomics samples of *Salicornia lagascae* shoots. S30 and S60: Plants obtained from micropropagation on solid medium and irrigated with 30 g/L and 60 g/L NaCl, respectively; L30 and L60: Plants obtained from micropropagation in liquid medium and irrigated with 30 g/L and 60 g/L NaCl, respectively
