

Needs Assessment Survey

Implementation Note: This survey was provided to third year medical students while completing their rotations. This was distributed multiple times throughout the year to students to collect timely data.

This survey is to better understand the gaps in clinical skills knowledge you've encountered while entering rotations. Please let us know what things you wish you had learned prior to starting rotations so we can improve our clinical skills teachings.

1. What rotations have you done? (Select all that apply)
 - ☐ Surgery
 - ☐ Internal Medicine
 - ☐ OB/Gyn
 - ☐ Pediatrics
 - ☐ Family Medicine
 - ☐ Psychiatry
 - ☐ Neurology
2. What do you wish you knew how to do prior to starting a rotation? (Ex. Understanding what is on an IV pole, how to present 'X' result, certain procedural skills, etc.) (Short Answer)

3. Would you be willing to teach what you've learned to incoming M3's during their clerkship orientation?
 - ☐ Yes
 - ☐ No

4. If yes, what is your school email so we can reach out? (Short Answer)
