2. Perception of women towards CC self-sampling

Item	Agree	Neutral	Disagree
10. self-sampling is a good solution to reach more women who do not go to a general practitioner or gynaecologist for a Pap smear			
11. I find that a sample taken by a doctor is better than a self-sample			
12. I think that most women will choose a self-sample instead of going to a doctor			
13. HPV self-sample allows more privacy than the Pap smear			
14. I have had discomfort with the Pap smear			
15. HPV self-sample is faster than the Pap smear			
16. my provider did not offer cervical cancer screening			
17. I found the self-sample easy to use			
18. I feel I performed the self-sample test correctly			
19. I would use the self-sampler again			
20. Did you find the instructions for vaginal sampling clear?			
21. I would recommend this to my friends/family			
22. I find self-sample easier than a Pap smear, because then I don't need to go to the doctor			

23. I experienced pain and/or discomfort using the self-sample			
24. I prefer the self-sampler method over the Pap smear			

25. Preference for next screening

What would you prefer at your next screening?

☐ Self-sampling
 ☐ sampling by a clinician
 ☐ no preference
