

PRISMA 2020 Checklist

Determinants and Early Clinical Outcomes of Sepsis Among Adult Inpatients with Pneumonia: A Systematic Review and Meta-Analysis

Section	PRISMA item	Status	Location
Title	Identify report as systematic review	Done	Title page
Abstract	Structured summary	Done	Abstract
Introduction	Rationale	Done	Introduction
Introduction	Objectives	Done	Objectives
Methods	Eligibility criteria	Done	Pages 5–6
Methods	Information sources	Done	Page 5
Methods	Search strategy	Done	Page 5
Methods	Selection process	Done	Page 6
Methods	Data collection process	Done	Page 6
Methods	Data items	Done	Page 6
Methods	Risk-of-bias assessment	Done	Pages 15–16
Methods	Effect measures	Done	Page 6
Methods	Synthesis methods	Done	Pages 17–27
Methods	Reporting-bias assessment	Done	Pages 25–26
Methods	Certainty assessment	Done	Pages 26–27
Results	Study selection	Done	Pages 6–7
Results	Study characteristics	Done	Pages 8–15
Results	Risk-of-bias results	Done	Pages 15–17
Results	Results of individual studies	Done	Pages 14–15
Results	Results of syntheses	Done	Pages 17–27
Discussion	Discussion	Done	Pages 28–30
Other information	Registration and protocol	Done	Page 5
Other information	Support and funding	Done	Page 31
Other information	Competing interests	Done	Page 31
Other information	Availability of data	Done	Page 31

Funding: The authors received no specific funding for this study.

Conflicts of interest: The authors declare no competing interests.

Data availability: All data are included in the article and supplementary materials.

Protocol registration: PROSPERO CRD420261470556.
