

Point-by-Point Response to Technical Check (v1.1)

Manuscript ID: COMMSBIO-26-8059 v1.1
Titration of the Generational Memory Window:
Engine and Brake in the Evolutionary Substrate

Point 1: “The position of Figure Citation 1,2 is not defined in the manuscript. Please make sure the figure is cited in the text and indicate where it should be placed.”

Response: Both figures are now cited explicitly in the text with placement sentences: Fig. 1 (binding-rate transition) in Section 4.3 (“the transition is shown in Fig. 1”) and Fig. 2 (equilibrium Gini vs. eligibility timescale) in Section 5.3 (“the curve is shown in Fig. 2”). Each figure appears immediately after its citing paragraph, and the figure files are named Fig1/Fig2 accordingly. No other changes were made.
