

CLASSIFICATION OF OLIVE TREES BASED ON INFESTATION LEVEL.

Following the 2020 felling, four categories were identified based on the level of infestation:

1. Consistently healthy.
2. Mildly affected and cured.
3. Severely affected and cured.
4. Relapsing.

Olive trees never diseased < 10%

Olive trees never diseased < 10%

Mildly affected and cured olive trees = 45%

Severely affected and cured olive trees = 45%

Olive trees with recurrence = 0.25%
