Abbreviations

BCG: Bacille Calmette Guerin vaccine
DTP: diphtheria-tetanus-pertussis-containing vaccine
IPV: inactivated poliovirus vaccine
PCV: pneumococcal conjugate vaccine
MCV: measles-containing vaccine
MenA: vaccine targeting *Neisseria meningitidis* serogroup A
MMR: measles, mumps, rubella vaccine
OPV: oral poliovirus vaccine
YF: yellow fever vaccine

* Vaccine included in catch-up separate to Gavi fully funded vaccine support for the BCU
** Number refers to vaccine dose, i.e. DTP1=first dose of diphtheria–tetanus–pertussis containing vaccine
*** “Yes” indicates that the dose is in the national routine immunization schedule for children and that catch-up doses were provided according to the catch-up/delayed schedule for the country during Big Catch-up immunization activities.

Notes

¹Burkina Faso introduced IPV2 in 2021
²Cameroon introduced IPV2 in 2023
³DRC introduced IPV2 in 2022
⁴DRC introduced MCV2 in 2022
⁵The Gambia also approved for human papillomavirus vaccine as part of BCU though this did not figure in childhood vaccines for RCM
⁶The Gambia additionally assessed children for OPV4 and OPV5 doses
⁷The Gambia introduced IPV2 in 2023
⁸Guinea introduced MCV2 in 2022
⁹Mali introduced IPV2 in 2021
¹⁰South Sudan introduced IPV2 in 2021
¹¹South Sudan introduced MCV2 in August 2025
¹²Tajikistan's BCU-supported doses were Pentavalent (DTP-HepB-Hib vaccine) and IPV, while RCM also assessed age-appropriate status for other routine vaccines including MMR1 and MMR2
¹³MMR2 is due in Tajikistan at 6 years; therefore, MMR2/MCV2 is outside of the 24–59-month eligibility and should be interpreted only among children age-eligible at 6 years.
