

Point-by-Point Response to Editor's Comments

Manuscript Title: *"Evaluating the Impact of a Structured Health Education Campaign on Breast Cancer Awareness, Knowledge, and Attitudes Among Undergraduate Medical Students: A Quasi-Experimental Study"*

Comment 1:

"We strongly encourage all authors to share their raw data, either by providing it in a supplementary file or depositing it in a public repository and providing the details on how to access it in this section. If you do not wish to share your data, please clearly state this in this section along with a justification."

Response:

We thank the editor for this comment. We have chosen not to share our raw data publicly or in a supplementary file, in order to protect the confidentiality of the undergraduate medical students who participated in this study as survey respondents. The following Data Availability Statement has been added to both the submission system and the manuscript, before the References section:

"The datasets generated and/or analysed during the current study are not publicly available due to concerns regarding participant confidentiality, but are available from the corresponding author on reasonable request."

This statement has been inserted in the manuscript under a new subheading titled "Data Availability Statement," placed just before the References section, and has also been entered in the corresponding field of the submission system as requested.
