

Table 7. Top-ranked actor entities in the post-policy synthesized evidence network based on weighted degree (2020–2025). Actor entities were ranked in descending order of weighted degree, representing the cumulative strength of their documented interactions in the synthesized evidence network. The table presents the top 15 rank positions, with all actor entities sharing a rank retained, resulting in 24 actor entities with weighted-degree values ranging from 56 to 11. The Helix column identifies the QHF category: Government, University, Industry, or Community, to which each actor entity was assigned. The full node-level network attributes for all 148 nodes are provided in Supplementary Information S4.
