

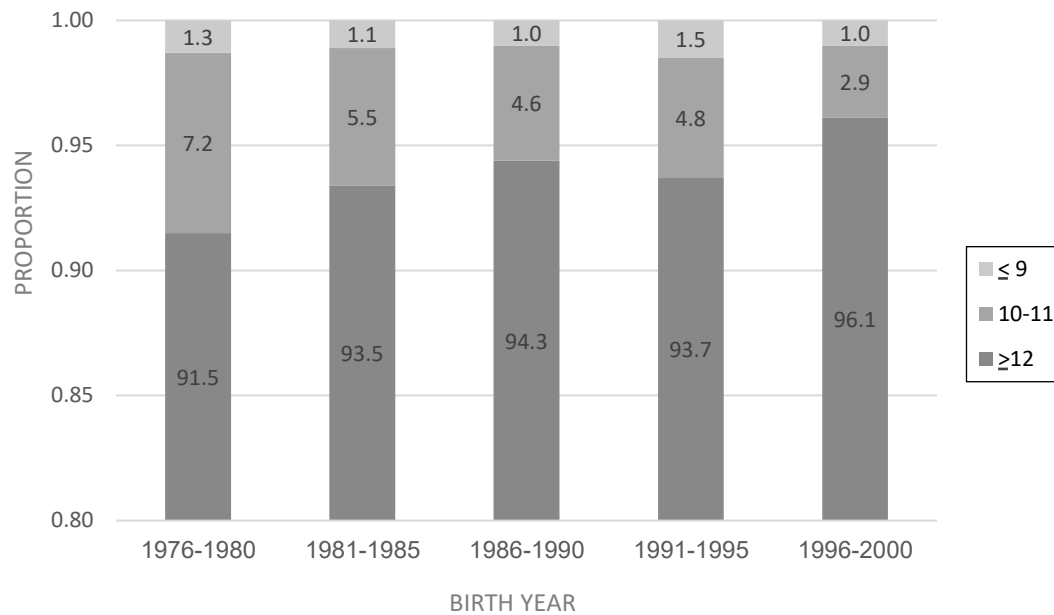

Figure S3. Stacked bar chart showing distribution of the educational level achieved by birth cohorts

Educational level was determined by the number of years of formal education; ≤ 9 = nine years or less of education, 10-11 = 10 to 11 years of education, ≥ 12 = twelve years of education at least, including higher and academic education.

P-value < 0.001 for each educational level by birth cohort, analyzed using the Cochran-Armitage test for trend
