

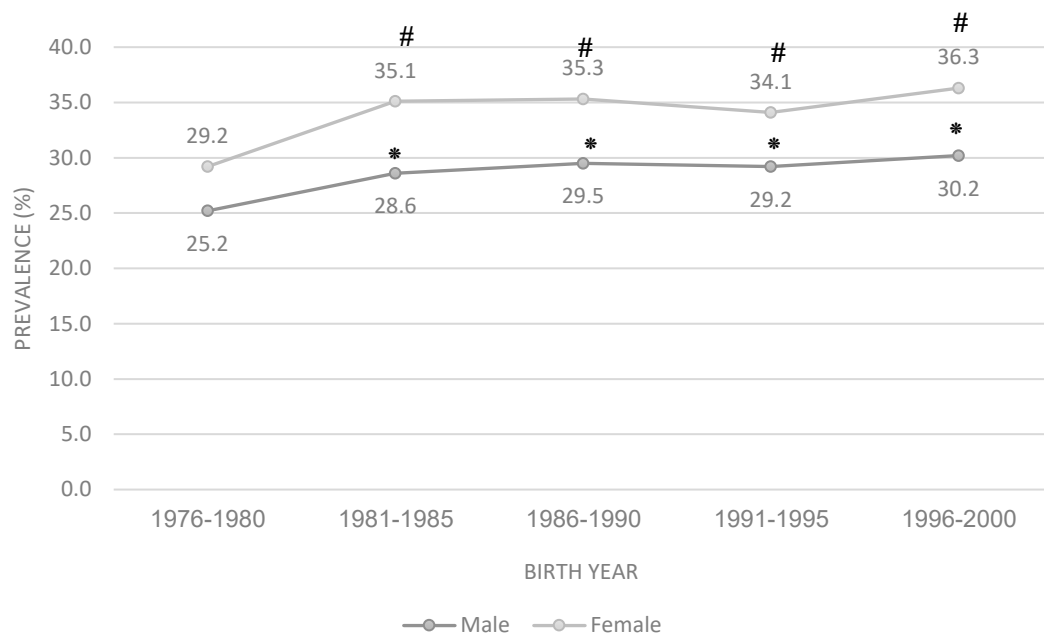

Figure S2. Prevalence of Myopia by Birth-cohort stratified by Gender

* $P < 0.001$ for comparing myopia prevalence among males in each birth cohort with the oldest cohort (1976-1980), using the Cochran-Armitage test for trend followed by Tukey's HSD test for multiple pairwise comparisons.

$P < 0.001$ for comparing myopia prevalence among females in each birth cohort with the oldest cohort (1976-1980), using the Cochran-Armitage test for trend followed by Tukey's HSD test for multiple pairwise comparisons.
