

Historical accounting from retained project records  
Method-family candidates (n=152) + separately verified privacy set (n=6);  
reused fairness pool (n=202) + official texts (n=5)

Documented candidates before identifier verification and de-duplication (n=152)  
(reused corpus and official texts handled as separate pools)

Screened on title/abstract and full text for technical-method  
relevance

Identifier/citation verification: every candidate checked by arXiv/DOI  
resolution and database cross-check

Verified method references (n=141)  
(63 confirmed, 78 corrected)

Excluded (n=11):  
unverifiable against a  
canonical record (6);  
duplicates (5)

Released evidence set: 347 unique sources, 354 non-disjoint memberships  
147 indexed + 202 reused fairness + 5 official-text memberships;  
pool overlaps documented in the canonical source manifest
