

BMC infectious diseases supplementary

Tham Hoang

November 2021

List of Supplementary Figures

1	Percentage of Clades by month in Vietnam and Thailand.	2
2	Percentage by Lineage by month in Vietnam and Thailand.	2
3	Scatter plots of allele frequency from datasets: one from WGS of Vietnamese people in the 1000 Genomes Project with high coverage, and the other from WGS of 1000 Vietnamese people [1] with nine immune gene sets associated with severity of COVID-19 in Vietnam.	3
4	Scatter plots of allele frequency from datasets: one from WGS of Vietnamese people in the 1000 Genomes Project with high coverage, and the other from WGS of 1000 Vietnamese people [1] with 6 target gene sets of COVID-19 drugs used in Vietnam.	4

1 Supplementary Figures

Supplementary Figure 1: Percentage of Clades by month in Vietnam and Thailand.

Supplementary Figure 2: Percentage by Lineage by month in Vietnam and Thailand.

Supplementary Figure 3: Scatter plots of allele frequency from datasets: one from WGS of Vietnamese people in the 1000 Genomes Project with high coverage, and the other from WGS of 1000 Vietnamese people [1] with nine immune gene sets associated with severity of COVID-19 in Vietnam.

Supplementary Figure 4: Scatter plots of allele frequency from datasets: one from WGS of Vietnamese people in the 1000 Genomes Project with high coverage, and the other from WGS of 1000 Vietnamese people [1] with 6 target gene sets of COVID-19 drugs used in Vietnam.
