**Supplementary Figure 1. Map of collected time points for each surgical procedure.**

DRAPING TIME (min): time required to apply sterile covers to the robotic system (robot_draping_time).

DOCKING TIME (min): time from the start of robot docking (start_robot_docking, after trocar positioning) to the start of the surgical procedure (time_procedure_start).

HYSTERECTOMY TIME (min): time from the start of hysterectomy (time_hysterectomy_start, usually round-ligament dissection) to completion of colpotomy (time_hysterectomy_finish).

COLPORRHAPHY TIME (min): time from completion of uterine extraction (end_extraction) to completion of vaginal cuff closure (vaginal_cuff_suture_end).

UNDOCKING TIME (min): time from completion of the surgical procedure (time_procedure_finish) to complete robot disengagement (undocking_end).
