

Uncropped gel image corresponding to Extended Data Fig. 4 and Fig. 3e.
Insertion of a 1,419-bp DNA donor at the *ACTB* and *HSP90AA1* loci

Uncropped gel image corresponding to Extended Data Fig. 4. Insertion of a 1,419-bp DNA donor at the *DYNLT1* and *GAPDH* loci

Uncropped gel image corresponding to Extended Data Fig. 4. Insertion of a 1,419-bp DNA donor at the *EEF1A1* locus

Representative flow cytometry gating strategies for quantifying editing efficiency, illustrating the targeted knock-in of a donor template at the TLR locus in HEK293T-40-TLR cells.
