Table 1. Distribution of associated ultrasound abnormalities in fetuses with ventriculomegaly (n = 48)

Associated ultrasound abnormalities	n	Percentage (%)
Corpus callosum dysgenesis/partial agenesis	7	14.6
Abnormal cavum septi pellucidi (thin, poorly visualized, or absent)	8	16.7
Cerebellar vermis hypoplasia or underdevelopment	5	10.4
Periventricular pseudocysts	6	12.5
Irregular ventricular wall contour/subependymal heterotopia	5	10.4
Delayed cortical maturation	4	8.3
Choroid plexus cysts	8	16.7
Extracranial structural abnormalities (including cleft lip/palate, congenital heart defects, etc.)	5	10.4
Total	48	100
