CONSORT 2025 checklist of information to include when reporting a randomised trial*

Section / Topic	No	CONSORT 2025 checklist item description	Reported on page no.
Title and abstract			
Title and structured abstract	1a	Identification as a randomised trial	Reported on page 1
	1b	Structured summary of the trial design, methods, results, and conclusions	Reported on page 4-5
Open science			
Trial registration	2	Name of trial registry, identifying number (with URL) and date of registration	Reported on page 8
Protocol and statistical analysis plan	3	Where the trial protocol and statistical analysis plan can be accessed	Reported on page 8
Data sharing	4	Where and how the individual de-identified participant data (including data dictionary), statistical code and any other materials can be accessed	Reported on page 26
Funding and conflicts of interest	5a	Sources of funding and other support (e.g., supply of drugs), and role of funders in the design, conduct, analysis and reporting of the trial	Reported on page 27
	5b	Financial and other conflicts of interest of the manuscript authors	Reported on page 26
Introduction			
Background and rationale	6	Scientific background and rationale	Reported on pages [5-6]
Objectives	7	Specific objectives related to benefits and harms	Reported on page 7
Methods			
Patient and public involvement	8	Details of patient or public involvement in the design, conduct and reporting of the trial	Not reported.
Trial design	9	Description of trial design including type of trial (e.g., parallel group, crossover), allocation ratio, and framework (e.g., superiority, equivalence, non-inferiority, exploratory)	Reported on pages 8-9

Changes to trial protocol	10	Important changes to the trial after it commenced including any outcomes or analyses that were not prespecified, with reason	Not reported.
Trial setting	11	Settings (e.g., community, hospital) and locations (e.g., countries, sites) where the trial was conducted	Reported on page 8
Eligibility criteria	12a	Eligibility criteria for participants	Reported on page 8
	12b	If applicable, eligibility criteria for sites and for individuals delivering the interventions (e.g., surgeons, physiotherapists)	Reported on pages 9-10
Intervention and comparator	13	Intervention and comparator with sufficient details to allow replication. If relevant, where additional materials describing the intervention and comparator (e.g., intervention manual) can be accessed	Reported on page 9
Outcomes	14	Pre-specified primary and secondary outcomes, including the specific measurement variable (e.g., systolic blood pressure), analysis metric (e.g., change from baseline, final value, time to event), method of aggregation (e.g., median, proportion), and time point for each outcome	Reported on pages [10–12].
Harms	15	How harms were defined and assessed (e.g., systematically, non-systematically)	Not reported.
Sample size	16a	How sample size was determined, including all assumptions supporting the sample size calculation	Reported on pages 8-9.
	16b	Explanation of any interim analyses and stopping guidelines	Not reported.
Randomisation:			
Sequence generation	17a	Who generated the random allocation sequence and the method used	Reported on page 9

	17b	Type of randomisation and details of any restriction (e.g., stratification, blocking and block size)	Reported on page 9
Allocation concealment mechanism	18	Mechanism used to implement the random allocation sequence (e.g., central computer/telephone; sequentially numbered, opaque, sealed containers), describing any steps to conceal the sequence until interventions were assigned	Reported on page 9
Implementation	19	Whether the personnel who enrolled and those who assigned participants to the interventions had access to the random allocation sequence	Not reported.
Blinding	20a	Who was blinded after assignment to interventions (e.g., participants, care providers, outcome assessors, data analysts)	Reported on pages 10,23
	20b	If blinded, how blinding was achieved and description of the similarity of interventions	Reported on pages 3-10
Statistical methods	21a	Statistical methods used to compare groups for primary and secondary outcomes, including harms	Reported on page 11
	21b	Definition of who is included in each analysis (e.g., all randomised participants), and in which group	Reported on pages 11-12
	21c	How missing data were handled in the analysis	Reported on page 11.
	21d	Methods for any additional analyses (e.g., subgroup and sensitivity analyses), distinguishing prespecified from post-hoc	Reported on page 11.
Results			
Participant flow, including flow diagram	22a	For each group, the numbers of participants who were randomly assigned, received intended intervention, and were analysed for the primary outcome	Reported on pages 12-13

	22b	For each group, losses and exclusions after randomisation, together with reasons	Reported on page 13.
Recruitment	23a	Dates defining the periods of recruitment and follow-up for outcomes of benefits and harms	Reported on page 8.
	23b	If relevant, why the trial ended or was stopped	Not reported.
Intervention and comparator delivery	24a	Intervention and comparator as they were actually administered (e.g., where appropriate, who delivered the intervention/comparator, how participants adhered, whether they were delivered as intended [fidelity])	Reported on page 9-10.
	24b	Concomitant care received during the trial for each group	Not reported.
Baseline data	25	A table showing baseline demographic and clinical characteristics for each group	Reported on page 14.
Numbers analysed, outcomes and estimation	26	For each primary and secondary outcome, by group: ● the number of participants included in the analysis ● the number of participants with available data at the outcome time point ● result for each group, and the estimated effect size and its precision (such as 95% confidence interval) ● for binary outcomes, presentation of both absolute and relative effect size	Reported on pages [15-18]
Harms	27	All harms or unintended events in each group	Not reported.
Ancillary analyses	28	Any other analyses performed, including subgroup and sensitivity analyses, distinguishing pre-specified from post-hoc	Reported on pages [12-18]
Discussion			

Interpretation	29	Interpretation consistent with results, balancing benefits and harms, and considering other relevant evidence	Reported on pages [18-21]
Limitations	30	Trial limitations, addressing sources of potential bias, imprecision, generalisability, and, if relevant, multiplicity of analyses	Reported on pages [22-24]

*We strongly recommend reading this statement in conjunction with the CONSORT 2025 Explanation and Elaboration and/or the CONSORT 2025 Expanded Checklist for important clarifications on all the items. We also recommend reading relevant CONSORT extensions. See www.consort-spirit.org.
