Supplementary spatial-response figure

Article

The Syncytial Mesh Model: glial spatial control, neuronal response geometry, and the limits of local EEG reduction

Journal

Cognitive Neurodynamics

Author

Andreu Ballús Santacana

Affiliation

Department of Philosophy, Universitat Autònoma de Barcelona, Cerdanyola del Vallès, Spain

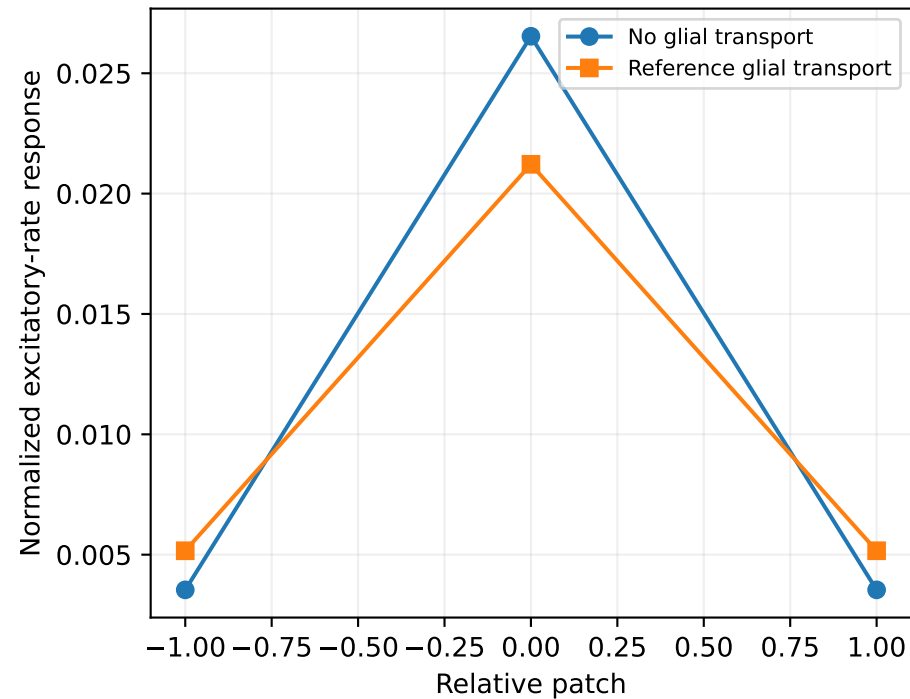

Corresponding author

andreu.ballus@uab.cat

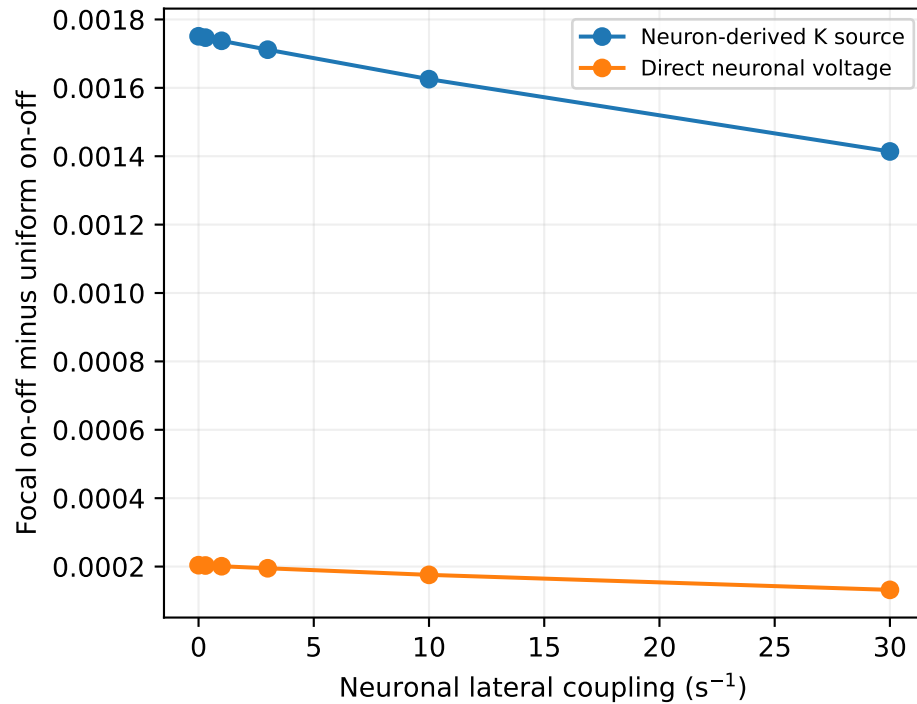

Contents

Model-level comparison of neuronal inputs, neighboring response interaction and transport-dependent ratios.

(A) Neuron-derived K source

(B) Adjacent response interaction

(C) Ratio contrast (descriptive)
