Aim of Study

Study design

- Randomized controlled trial
- Non-randomized experimental study
- Cohort study
- Comparative Analysis
- Cross-sectional study
- Qualitative research
- Prevalence study
- Other

Population

Sample size

Inclusion criteria

Exclusion criteria

Perioperative Characteristics

Surgical Procedures

- Total Mastectomy
- Partial Mastectomy
- Quadrantectomy
- Radical Mastectomy
- Modified Radical Mastectomy
- Unilateral Mastectomy
- Bilateral Mastectomy
- Skin-Sparing Mastectomy
- Nipple-Sparing Mastectomy
- Immediate Implant Reconstruction

Autologous Flap Reconstruction
Tissue Expander Reconstruction
Sentinel Lymph Node Biopsy
Axillary Lymph Node Biopsy
Other

Regional Anesthetic Techniques

Check what was utilized at all in every paper

Thoracic Paravertebral Block
Thoracic Epidural
PECS I
PECS II
PECS (unspecified)
Serratus Anterior Plane Block
Serratus Posterior Plane Block
Serratus Intercostal Plane Block
Erector Spinae Plane Block
Rhomboid Intercostal Block
RISS Block
Retrolaminar Block
Pecto-serratus Plane Block
Interpectoral Plane Block
Other

Systemic Analgesic Strategy Used

Opioid-Based Analgesia
Opioid-Free Analgesia
Multimodal Analgesia
Other

Systemic Analgesic Agents

Check what was utilized intraoperatively for analgesia

Opioids
Ketamine
Dexmedetomidine
Dexamethasone
NSAIDs
Acetaminophen
Magnesium Sulfate
Gabapentin

Esmolol
Other

Study Interventions

Describe the intervention group(s), comparator group(s), and sample size(s) for each study arm.

Group [name]: [group descriptors] (n = X)

Group XX: XXXXX (n = X)

Outcomes

Outcomes reported

Which PRIMARY outcomes related to this review were reported in the study

VAS Pain Score
NRS Pain Score
Post-operative Opioid Consumption
Post-operative Non-Opioid Consumption
PONV
Length of Hospital Stay
Rescue Analgesic Requirement
Time to First Rescue Analgesic
QoR-15 Score
QoR-40 Score
Regional Anesthesia-Related Complications
Systemic Analgesic-Related Complications
Other

Overall Study Findings

Key Findings
