Online Resource 4. Phenotypic antimicrobial susceptibility profiles of ESBL-producing Enterobacteriaceae isolates (n = 20)| Antimicrobial susceptibility profiles of the 20 ESBL-producing Enterobacteriaceae isolates determined using the VITEK® 2 AST-N233 card according to the EUCAST 2021 recommendations. Results are expressed as susceptible (S) or resistant (R). ESBL production was phenotypically confirmed using the Modified Double Disc Synergy Test (MDDST).
