10 SEGMENTS → MERGED INTO TURN 0 (DOCTOR)

SPEAKER_01 Good morning, come in, have a seat.
0:15–0:17

SPEAKER_01 What brings you in today?
0:18–0:19

SPEAKER_01 Good morning, doctor.
0:20–0:21

SPEAKER_01 I've been getting a pain in my chest, here in the middle.
0:21–0:24

SPEAKER_01 It's been about two weeks now.
0:25–0:26

SPEAKER_01 I see.
0:27–0:27

SPEAKER_01 Tell me more about this pain.
0:28–0:29

SPEAKER_01 What does it feel like?
0:30–0:31

SPEAKER_01 Like a tightness, doctor.
0:31–0:33

SPEAKER_01 Like something heavy pressing on my chest.
0:34–0:36

8 SEGMENTS → MERGED INTO TURN 1 (PATIENT)

NO CLUSTER And when does it come on?
0:37–0:38

NO CLUSTER Mostly when I'm doing something...
0:38–0:40

NO CLUSTER Yesterday I was pushing the freewheeler to the shed, and it came on badly.
0:41–0:44

NO CLUSTER When I climb the stairs at home also.
0:45–0:47

SPEAKER_00 How long does it last?
0:47–0:49

SPEAKER_00 Maybe 5 minutes, 10 minutes.
0:50–0:52

"What was heard" - raw pre-merge speech segments on demand, including segments the diariser could not cluster; the capture-method degradation discussed in the text is inspectable here. (Same consultation as Figures 5-7.)

REFERRAL LETTER — CARDIOLOGY

approved 2026-07-31 21:41 · Doctor

Dear Colleague,

Re: Ranjit Perera, 52 y, M

[to be completed by the referring doctor]

The pain is mid-chest tightness/heavy pressure, lasting 5-10 minutes, triggered by exertion and resolving with rest; it radiated to the left arm once. He experiences associated shortness of breath but no sweating or vomiting. Occasional burning occurs after large meals, distinct from this current pain. He smokes one pack per day for 20-30 years and drinks alcohol on weekends (2-3 glasses). Past medical history includes hypertension diagnosed last year (untreated) and cholesterol. His father had a myocardial infarction around age 60. He takes no regular medications and has no known allergies.

Pulse is 88 regular, BP 150/95. Heart sounds are normal, lungs clear, and there is no chest wall tenderness.

An ECG was arranged today.

He wants reassurance it isn't a heart attack right now.

Thank you for seeing him.

Yours faithfully,
Doctor
