CAMBRIDGE PSYCHOLOGY RESEARCH ETHICS COMMITTEE

22 November 2024

Application No: PRE.2024.076

Dear Dr Parkes-Ratanshi

Call for Life: Exploring mHealth solutions for enhancing childhood vaccinations among displaced children in conflict-affected settings of Nigeria

The Cambridge Psychology Research Ethics Committee has given favourable opinion to your research project *Call for Life: Exploring mHealth solutions for enhancing childhood vaccinations among displaced children in conflict-affected settings of Nigeria* as set out in your application submitted on 04 October 2024.

The Committee attaches certain standard conditions to all favourable opinions. These are:

(a) that if the staff conducting the research should change, any new staff should read the application submitted to the Committee for ethical review and this letter (and any subsequent letter concerning this application for ethical review). An amendment request should also be submitted (guidance at www.bio.cam.ac.uk/psyres/amendments);
(b) that if the procedures used in the research project should change or the project itself should be changed, you should consider whether it is necessary to submit a further application for any modified or additional procedures to be reviewed;
(c) that if the employment or departmental affiliation of the staff should change, you should notify us of that fact.

Members of the Committee also ask that you inform them should you encounter any unexpected ethical issues.

Ethical review will expire on 30 November 2025. If you require an extension, please submit an amendment request before the expiry date (guidance here: https://www.bio.cam.ac.uk/psyres/amendments).

If you would let us know that you are able to accept these conditions, we will record that you have been granted favourable opinion.

Yours sincerely

M Bodfish
