

Appendix 2 – Analysis for systematic bias of scaling programme participant non-responders

Table 1: Time 1 outcome measure scores for parents included and not included in analysis

Time 1	Mean score parents included in analysis (n)	Mean score parents not included in analysis (n)	Difference
SWEMWBS	20.5 (351)	20.8 (287)	n.s
MPG	36.9 (338)	37.3 (265)	n.s
CAMC total score	63.3 (342)	57.8 (269)	p=0.03
Total Parenting Scale	3.5 (352)	3.5 (272)	n.s

Note: The sample size fluctuates per measure due to pairwise deletions of missing data.

Table 2: Time 1 demographic data for parents included and not included in the analysis

Time 1	Parents included in analysis (n)	Parents not included in analysis (n)	Difference
Parent age	34.3 years (385)	33.6 years (309)	n.s
Child age	5.0 years (278)	4.4 years (232)	n.s
Lone parent status	37.5% (360)	36.2% (301)	n.s
White British	71.7% (361)	63.3% (305)	p=0.02
Left school before age 16	25.4% (354)	25.6% (298)	n.s
Unemployed	21.0% (357)	21.9% (302)	n.s

Note: The sample size fluctuates per measure due to pairwise deletions of missing data.
