

**Table 7 - Supplementary information file: raw data from the selection process**

Title	Inclusion criterias 1 (public oral health policy OR dental caries OR ART) - 1. included/ 2. not included	Exclusion criteria 1 (dental caries and/or restorative materials, and or ART outside the policies context )	Exclusion criteria 2 (specific interventions )	Exclusion criteria 3 (Oral health policy, not related to ART)	Exclusion criteria 4( studies that contained duplicated data with primary studies or that do not address the issue in the context of implementation)	Studies included in review (1. included/ 2. not included)
A 5-year follow-up of older adults residing in long-term care facilities: utilisation of a comprehensive dental programme	1			X		2
A case-control study of differences between regular and causal adult attenders in general dental practice	1			X		2
A clinical evaluation of resin-based composite and glass ionomer cement restorations placed in primary teeth using the ART approach: results at 24 months	1	X				2
A community health center dental program in Boston, U.S.A	1	X		X		2
A comparative study of fluoride release from two different sealants	1	X				2
A comparative study of the clinical efficiency of chemomechanical caries removal using Carie-Care gel for permanent teeth of children of age group of 12-15 years with that of conventional drilling method: A randomized controlled trial	1	X				2
A comparison of dental caries and tooth loss for Iowa prisoners with other prison populations and dentate U.S. adults	1	X				2
A comparison of the effectiveness of the "Toothkeeper" and a traditional dental health education program	1	X				2
A comparison of the sedation provision of NHS dental services 2014-2016 for local authorities throughout England	1			X		2
A dental care programme for occasional dental attenders	1			X		2
A escola como espaço promotor de saúde bucal: cuidando de escolares por meio de ações coletivas/ The school space as promoter of oral health: caring for childrenthrough collective programs	1		X			2
A field program of planned dental treatment and dental health education in Tonaki (Okinawa prefecture) [author's transl]	1		X			2
A group of general dental practitioners&#039; views of preformed metal crowns after participation in the Hall technique clinical trial: a mixed-method evaluation.	1	X				2
A method of planning a dental treatment program for an institutionalized population	1	X				2
A mobile dental system in southern Africa	1		X			2
A pilot of a school-based dental treatment programme for vulnerable children with possible dental neglect: the Back2School programme	1		X			2
A PILOT TRIAL OF THE IMPACT OF FINANCIAL INCENTIVE ON THE UTILIZATION OF DENTAL SERVICES AMONG CIVIL SERVANTS IN IBADAN, NIGERIA	1	X				2
A prospective and randomized clinical trial evaluating the effectiveness of ART restorations with high-viscosity glass-ionomer cement versus conventional restorations with resin composite in Class II cavities of permanent teeth: two-year follow-up	1	X				2
A study on the epidemiology of permanent tooth caries in children aged 15 years in Anhui province]	1	X				2
A study on the state of dental treatment and carious diseases after treatment in industrial workers, especially on amalgam filling, inlay restoration and clasp application]	1	X				2
A utilização do tratamento restaurador atraumático modificado na clínica de odontopediatria/ Use of modified atraumatic restorative treatment in paediatric dentistry clinic	1	X				2
Academic recommendations on the need for treating carious deciduous molars and canine teeth in elementary school children--results of a survey of university dental clinics]	1	X				2

Acceptance of Minimally Invasive Dentistry Among US Dentists in Public Health Practices.	1		X			2
Access to oral healthcare services of adolescents of a large-size municipality in northeastern Brazil	1			X		2
Access to special care dentistry, part 5. Safety	1			X		2
Access to special care dentistry, part 8. Special care dentistry services: seamless care for people in their middle years - part 2	1			X		2
Aceitabilidade do tratamento restaurador atraumático pelos cirurgiões-dentistas do serviço público em São Paulo/ Atraumatic Restorative Treatment acceptability by dentists in the public service of São Paulo	1	X				2
Adequação do meio bucal através de tratamento restaurador atraumático modificado em pacientes pediátricos infectados pelo Vírus da Imunodeficiência Humana Adquirida (SIDA)/ Adequacy of the oral cavity by means of modified atraumatic restorative treatment in pediatric patients infected with the Acquired Human Immunodeficiency Virus (AIDS)	1	X				2
Adherence to an oral health program for HIV infected children and adolescents and the attitudes of their caretakers]	1			X		2
Adults' dental treatment in 2001-2013 in Finnish public dental service	1			X		2
Aerosol-free procedures against COVID-19 in pediatric dentistry	1	X				2
An assessment of strategies to control dental caries in Aboriginal children living in rural and remote communities in New South Wales, Australia	1	X				2
An evaluation of a school-based dental sealant programme	1	X				2
Analysis of prevalence and trends of dental caries in the Americas between the 1970s and 1990s.	1	X				2
Application of International Caries Detection and Assessment System (ICDAS) and Caries Management by Risk Assessment (CAMBRA) systems in child cancer patients: a clinical case report	1	X				2
ART integration in oral health care systems in Latin American countries as perceived by directors of oral health	1					1
ART restorations and glass ionomer sealants in Zimbabwe: survival after 3 years	1					1
ART with high viscosity GIC and composite restorations in class II cavities: can they thrive in the post-amalgam era?	1	X				2
ART: a minimal intervention approach to manage dental caries.	1	X				2
ARTiculating concerns about interim therapeutic restorations	1	X				2
Aspectos atuais do tratamento restaurador atraumático/ Current aspects of atraumatic restorative treatment	1	X				2
Assessing changes in oral health-related quality of life and body growth in 3-5 years old children following dental treatment under general anaesthesia due to severe dental caries	1	X				2
Assessment of anxiety and stress markers in children submitted to educational strategies and ART-restoration: A randomized clinical trial	1	X				2
Assessment of Atraumatic Restorative Treatment (ART) on the permanent dentition in a primary care setting in Nigeria	1		X			2
Assessment of Discomfort Experienced by School Children While Performing 'ART' and 'MCP'-An Experimental Study	1	X				2
Association between oral health-related quality of life and atraumatic restorative treatment in school children: an exploratory study	1	X				2
Associations between Child Snack and Beverage Consumption, Severe Dental Caries, and Malnutrition in Nepal	1	X				2
Atraumatic dental treatment among Finnish elderly persons	1	X				2

Atraumatic Restorative Treatment (ART) in pediatric dentistry residency programs: a survey of program directors	1	X				2
Atraumatic restorative treatment (ART): a three-year clinical study in Malawi—comparison of conventional amalgam and ART restorations	1	X				2
Atraumatic restorative treatment (ART): rationale, technique, and development	1	X				2
Atraumatic Restorative Treatment (ART): the Tanzanian experience.	1					1
Atraumatic Restorative Treatment (ART). A special tissue preservative and patient-friendly approach]	1	X				2
Atraumatic restorative treatment and dental anxiety in outpatients attending public oral health clinics in South Africa	1		X			2
Atraumatic restorative treatment and glass ionomer sealants in Tunisian children: survival after 3 years	1					1
Atraumatic restorative treatment and glass-ionomer sealants in a school oral health programme in Zimbabwe: evaluation after 1 year	1					1
Atraumatic restorative treatment and oral health in Upper Egypt	1					1
Atraumatic restorative treatment compared to the Hall Technique for occluso-proximal carious lesions in primary molars; 36-month follow-up of a randomised control trial in a school setting.	1	X				2
Atraumatic Restorative Treatment compared to the Hall Technique for occluso-proximal cavities in primary molars: study protocol for a randomized controlled trial	1	X				2
Atraumatic restorative treatment for prevention and treatment of caries in an underserved community	1		X			2
Atraumatic restorative treatment to control dental caries: history, characteristics, and contributions of the technique]	1				X	2
Atraumatic restorative treatment versus conventional restorative treatment for managing dental caries	1	X				2
Atraumatic restorative treatment, as part of a basic package of oral health services in rural areas of Bolivia: evidence on the effectiveness of atraumatic restoration treatment implementation and of oral health promotion measures among 6-14 year-old students, in rural areas with dispersed population]	1					1
Atraumatic restorative treatments improve child oral health-related quality of life: A noninferiority randomized controlled trial	1	X				2
Atraumatic Restorative Treatments in Australian Aboriginal Communities: A Cluster-randomized Trial	1	X				2
Atraumatic restorative treatments reduce the need for dental general anaesthesia: a non-inferiority randomized	1	X				2
Attitudes of Chinese parents toward the oral health of their children with caries: a qualitative study	1	X				2
Avaliação clínica da alteração da microflora oral por meio da utilização do tratamento restaurador atraumático (AU)/ Clinical assessment on the oral microflora alteration through the use of atraumatic restorative treatment	1	X				2
Avaliação da efetividade da técnica do tratamento restaurador atraumático (TRA) e sua aplicabilidade em saúde pública nas crianças das creches do município de Belém-Pará	1		X			2
Avaliação da percepção das equipes de saúde bucal da Secretaria Municipal da Saúde de Curitiba (PR) sobre o tratamento restaurador atraumático (ART)./ [Evaluation of the perception of the oral health teams of the municipal health department of Curitiba	1	X				2
Avaliação de restaurações realizadas com cimento de ionômero de vidro nacional no tratamento restaurador atraumático/ Evaluation of restorations performed with Brazilian glass ionomer cement in atraumatic restorative treatment	1	X				2

Avaliação do grau de satisfação dos responsáveis em relação à utilização da técnica do tratamento restaurador atraumático em crianças/ Caregivers' satisfaction regarding the use of the atraumatic restorative treatment technique in children	1		X			2
Avaliação dos selantes de iônômero em primeiros molares permanentes recém erupcionados/ Evaluation of ionomer sealants in newly erupted first permanent molars	1	X				2
Barriers to restorative care as perceived by dental patients attending government hospitals in Tanzania	1				X	2
Barriers to restorative care as perceived by dental practitioners in Tanzania	1				X	2
Barriers to the adoption of the ART approach as perceived by dental practitioners in governmental dental clinics, in Tanzania	1					1
Beneath the surface of coronal caries: primary decay, recurrent decay, and failed restorations in a population-based survey of New England elders	1	X				2
Benefits of a community oriented fluoride mouth rinsing program]	1	X				2
Brazilian Oral Health Policy: factors associated with comprehensiveness in health care	1			X		2
Building community support for a school dental sealant program	1	X				2
Can minimal intervention dentistry help in tackling the global burden of untreated dental caries?	1	X				2
Caregiver satisfaction with interim silver diamine fluoride applications for their children with caries prior to operating room treatment or sedation	1	X				2
Cárie dentária em escolares: impacto na qualidade de vida e uso do tratamento restaurador atraumático como solução parcial da demanda/ Dental caries in school: impact on quality of life and partial solution of demand	1	X				2
Caries and the older patient	1	X				2
Caries experience and treatment need among adults responding to an invitation for dental examination and treatment in two Karelian communities in Russia	1	X				2
Caries experience in rural Victorian adolescents	1	X				2
Caries experience in the primary dentition and presence of plaque in 7-year-old Chinese children: A 4-year time-lag study	1	X				2
Caries experience of Egyptian adolescents: does the atraumatic restorative treatment approach offer a solution?	1	X				2
Caries experience of leukemic children during intensive course of chemotherapy	1	X				2
Caries in Croatian Army recruits in 2000]	1	X				2
Caries prevalence and treatment needs in young people in Portugal: the third national study	1	X				2
Caries prevalence in primary teeth of German and foreign children within the scope of the 1995/96 school entrance examination in Dusseldorf]	1	X				2
Caries prevalence of school-going boys and girls according to cleaning methods and soft drink-taking frequency in different localities, in and around Guwahati City	1	X				2
Caries treatment in Swedish adults: effectiveness, costs and equity. A 4-year follow-up study of data from the Swedish national dental health register	1	X				2
Caries-preventive effect of a one-time application of composite resin and glass ionomer sealants after 5 years	1	X				2
Carious lesions in permanent dentitions are reduced in remote Indigenous Australian children taking part in a non-randomised preventive trial	1	X				2

Cartilha para subsidiar a realização do tratamento restaurador atraumático em larga escala: TRA/ Primer to support the preparation of the atraumatic restorative treatment in large scale: TRA	1		X			2
Change in children's oral health-related quality of life following dental treatment under general anaesthesia for the management of dental caries: a systematic review	1	X				2
Change in Oral Health-Related Quality of Life Following Minimally Invasive Aesthetic Treatment for Children with Molar Incisor Hypomineralisation: A Prospective Study	1	X				2
Changes in dental caries prevalence in 12-year-old students in the State of Mexico after 9 years of salt fluoridation	1	X				2
Changes in preschool children's OHRQoL after treatment of dental caries: responsiveness of the B-ECHOIS	1	X				2
Changes in restorative caries treatment in 15-year-olds in Oslo, Norway, 1979-1996	1	X				2
Changes in the quality of life of Tanzanian school children after treatment interventions using the Child-OIDP	1		X			2
Chewing deficiencies in adults with multiple untreated carious lesions	1	X				2
Child oral health-related quality of life (COHQoL), enamel defects of the first permanent molars and caries experience among children in Western Australia	1	X				2
Children and adolescents' dental treatment in 2001-2013 in the Finnish public dental service	1	X				2
Children's Oral Health-related Quality of Life (OHRQoL) Three Years after Implementation of Treatment Protocols for Managing Cavitated Carious Dentine Lesions	1	X				2
China's oral care system in transition: lessons to be learned from Germany	1	X				2
City-level gender differentials in the prevalence of dental caries and restorative dental treatment	1	X				2
