Fig. S1. Heat-map of the differentially expressed DNA repair genes between GCNSCs and cisplatin-induced, doxorubicin-induced or X-ray-induced GCSCs.

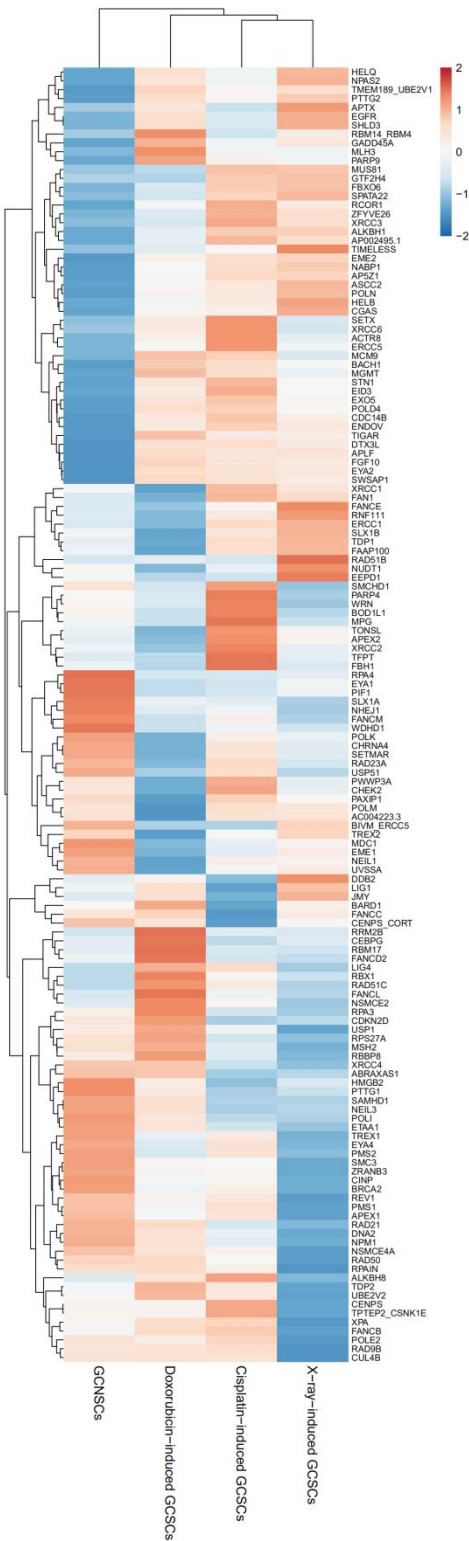

Table 1. Clinicopathological features of two samples from gastric cancer patients

Characteristics	NO.1	NO.2
Age(y)	75	64
Sex	Male	Female
Race	Asian	Asian
Tumor size(cm)	4~8	<4
Tumor location	Middle stomach	Lower stomach
Cell grade	Moderately differentiated	Moderately differentiated
Stage	IIIA	IIB
Lymphovascular invasion	Yes	No
