

DNA barcodes revealed population dependent cryptic diversity and various sympatry of Korean leptonetid spider

(Araneae: Leptonetidae)

Figure S2. Morphological photographs of each cryptic species from figure 4. upper panels: habitus (dorsal and ventral view); lower panels: left palp (prolateral and retrolateral view), (6) for right palp (retrolateral and prolateral view). Numbers of each panels matches with the numbers from figure 3. Scale bars: upper panels = 0.5mm, down panels = 0.1mm.

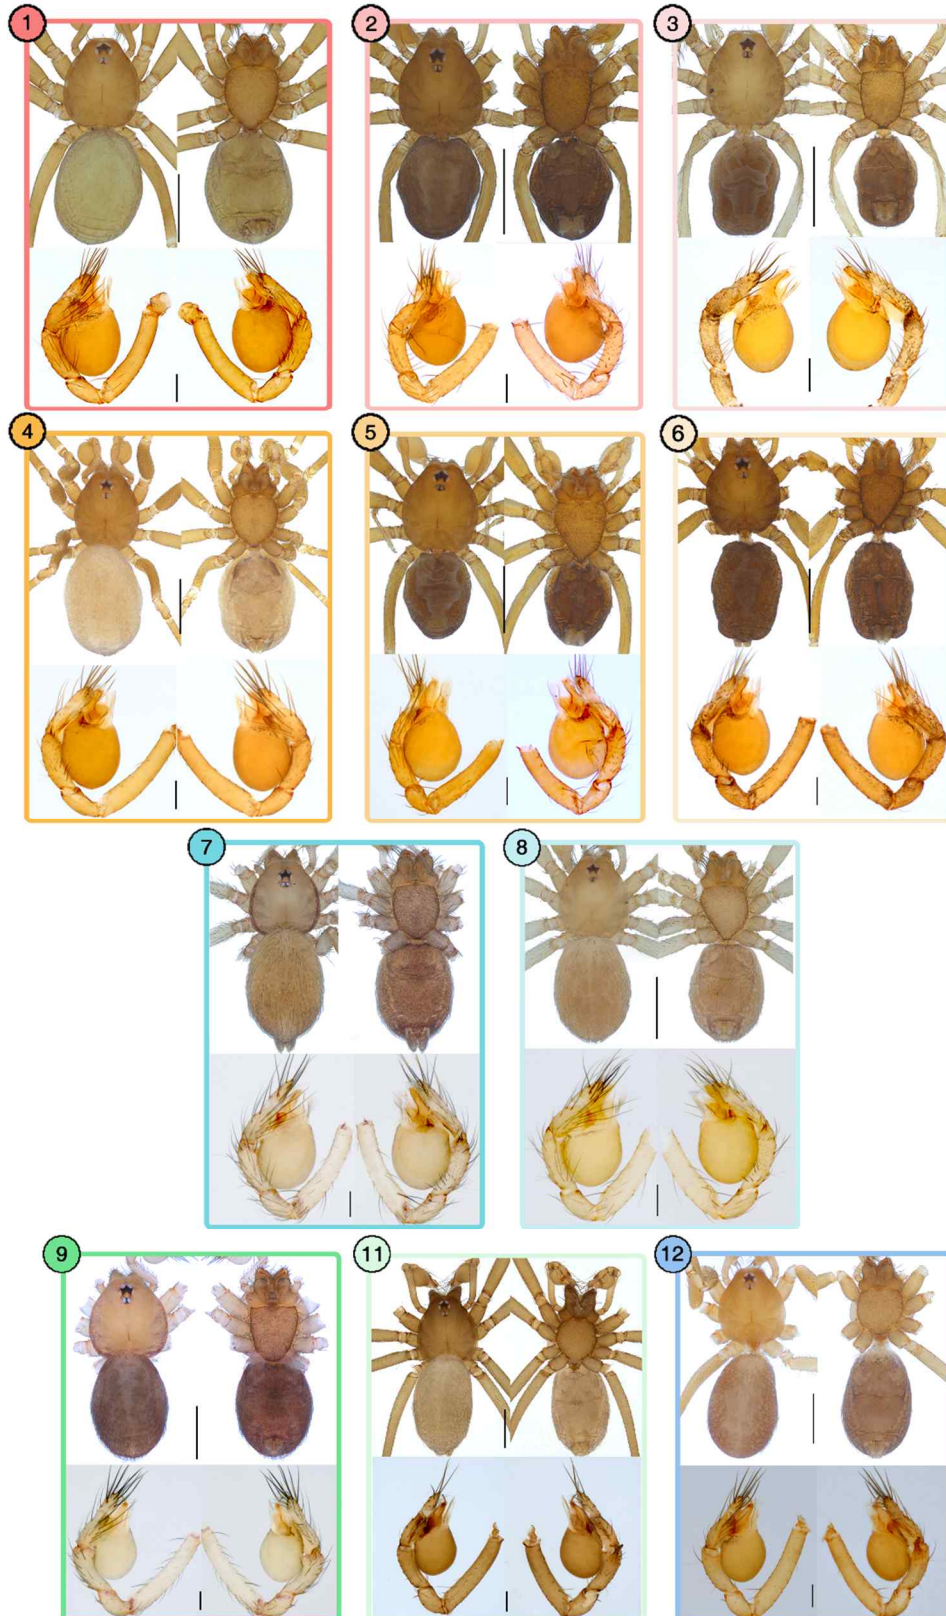

Figure S3. Morphological photographs of each cryptic species from figure 6. upper panels: habitus (dorsal and ventral view); lower panels: left palp (prolateral and retrolateral view). Numbers of each squares matches with the numbers from figure 5. Scale bars: upper panels = 0.5mm, down panels = 0.1mm.
