

Author's Biography

Sumathi Muthukumar is an Assistant Professor, Department of Mathematics, PSG College of Technology. She has received her PhD degree at Anna University, Chennai, India in Scholastic epidemic models. She has over 14 years of teaching and research experience. His fields of interest include Network models, epidemic models Stochastic epidemic models, and soft computing. She has published his research articles in various reputed international journals and international conference proceedings.

Muthukrishnan Senthilkumar is a Professor, Department of Applied Mathematics and Computational Sciences, PSG College of Technology. He has got Post Doctoral Fellowship from Department of Nanobio Materials and Electronics, (WCU), Gwangju Institute of Science and Technology (GIST), Gwangju, Republic of Korea. He is also a Visiting Professor to the School of Information and Communication, GIST, Republic of Korea. He has over 24 years of teaching and research experience. He has received PhD in Retrial Queueing Models from Anna University, Chennai, India. His biography is recognized and included in the biographies of Marquis Who's Who in the World 2013 and 2016. His fields of interest include retrial queueing theory, data communication and reliability engineering. He has published several research articles in refereed reputed journals. Currently he is guiding 4 PhD scholars.

epidemic models.

C. Veeramani is an Assistant Professor, Department of Applied Science (Mathematics), PSG College of Technology. He has received PhD degree in Fuzzy Optimization from Anna University, Chennai, India. He has over 15 years of teaching and research experience. His fields of interest include fuzzy optimization, fuzzy logic, soft computing and epidemic models. He has published his research articles in various reputed international journals and international conference proceedings. Currently, he is guiding 5 PhD scholars in the area of fuzzy optimization and fuzzy
