Appendix II: Data extraction instrument

This review extraction instrument will be composed of two sections;

1. General background information of studies

Table 1: General information

General information
Author and date
Title of study
Aim of study
Study setting
Study design/study population
Sample size/sampling method
Methodology/instrument
Outcomes/key findings
Limitations/gaps/directions

2. Key questions posed by the review will also be tabulated as follows:

Table 2: Review considerations

Review considerations
Author and date
Category of health personnel
Type of exposure
Risk of exposure
Knowledge on exposures/preventive measures
Predisposing factors of exposures
Utilization of universal precautions
