

Supplementary:

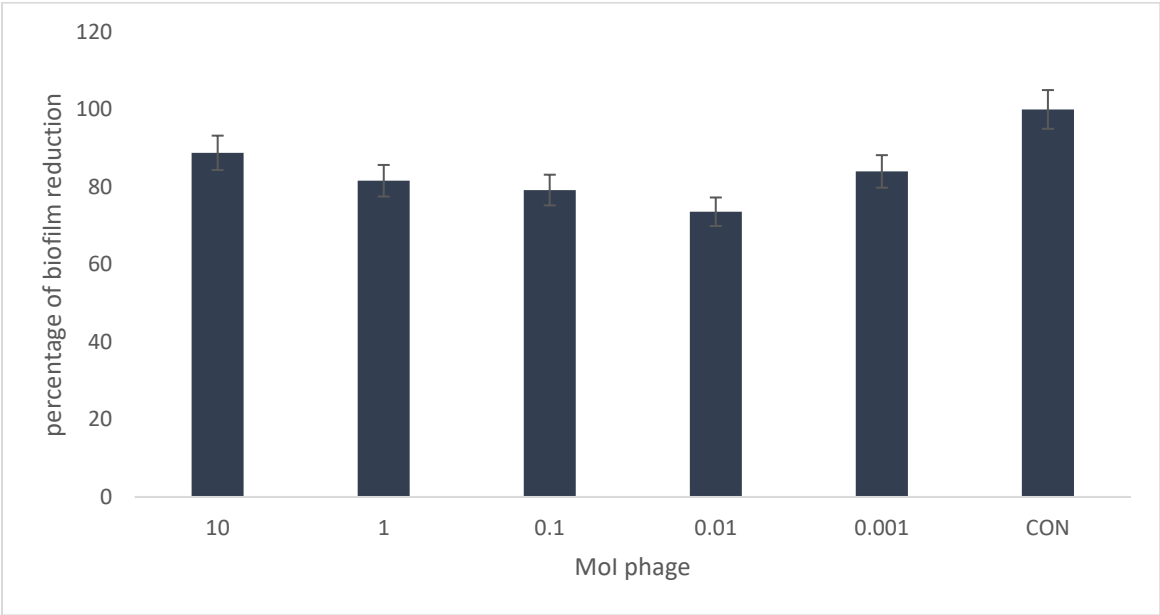

Figure 3a- percentage of biofilm reduction with phage in isolate AB-10

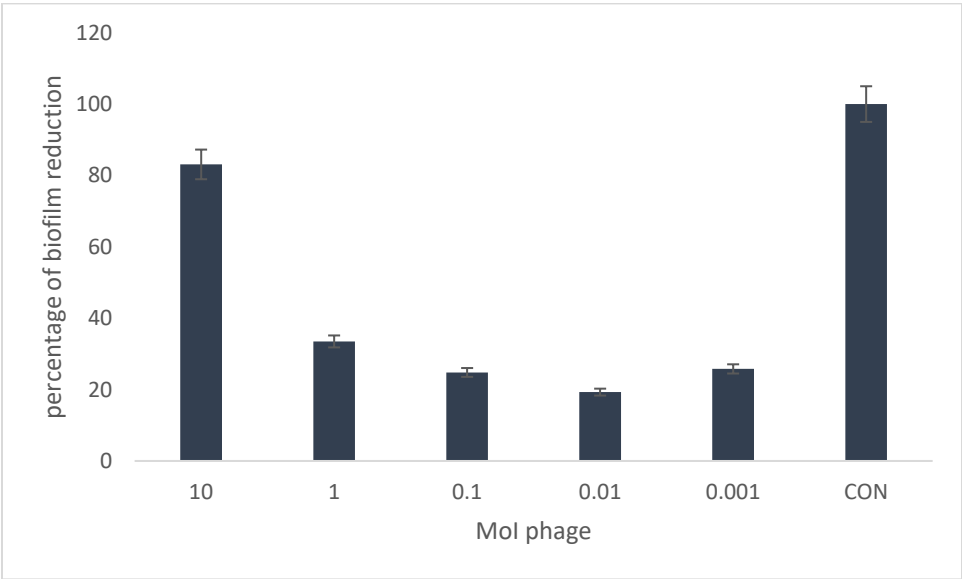

Figure 3b- percentage of biofilm reduction with phage in isolate AB-11

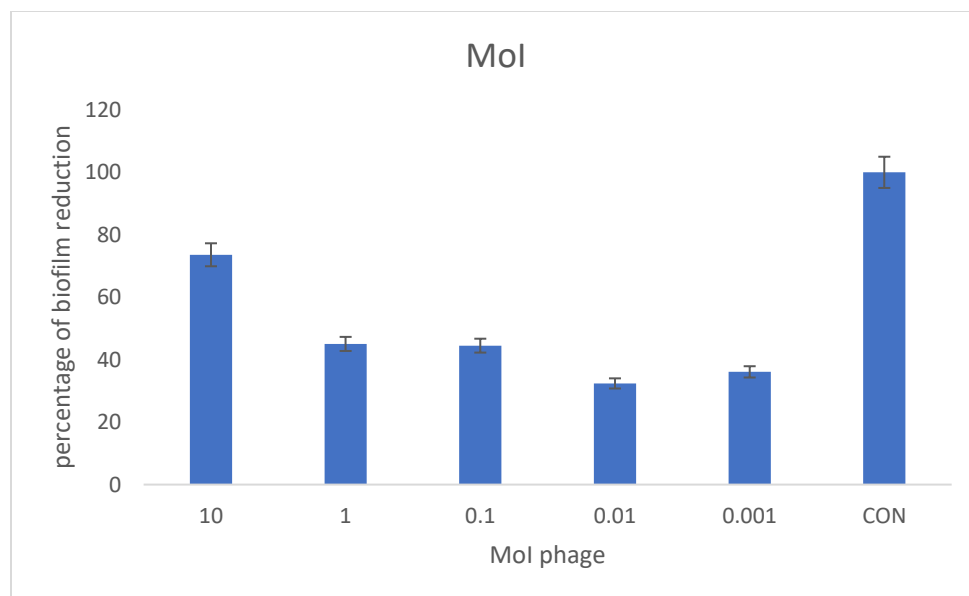

Figure 3c- percentage of biofilm reduction with phage in isolate AB-9

The phage treatment in three 11, 9 and 10 isolated. all isolated *A. baumannii* were colistin-resistant and they produce strong biofilm. Phage can reduce biofilms (19%-87%)
