

Human : Differentiated from WT HuES8-NPCs

Rat : Isolated from brain

Mouse

Supp. Data 1 bis : Expression of *IgL* gene in Human astrocytes and *Ighm*, *Igg1*, *Igg2*, *IgA* and *IgK* genes in rodents' astrocytes. The thick lines indicate the sequences covered by the reads retrieved from Geo DataSets repository. The accession numbers corresponding to the different RNA seq experiments analyzed as well as the tissue origin of the astrocytes are indicated.
