

Figure 1 is a dot plot showing the relative level of LncND5 in two groups: NC (Negative Control) and LncND5. The y-axis is labeled 'Relative level of LncND5' and ranges from 0 to 15. The NC group has a mean relative level of approximately 1.0, while the LncND5 group has a mean relative level of approximately 8.5. The difference is statistically significant (***).

Group	Relative level of LncND5 (Mean ± SD)
NC	1.0 ± 0.2
LncND5	8.5 ± 1.5
