

Supplementary material:

Current floods in Pakistan are expected to have continuing adverse effects on food security beyond the current year: a remote sensing perspective

Data availability:

1. **Original satellite data:** The data (MOD13Q1) analysed during the current study area is available in the Land Processes Distributed Archive Center (LP DAAC) which is a specialised data center within the NASA Earth Observing System Data and Information System (EOSDIS). The following link can be used to download the data.

<https://lpdaac.usgs.gov/products/mod13q1v061/>

Data Generated:

2. **Output of the clustering analysis** of the aforementioned data can be downloaded from <https://researchoutput.csu.edu.au/en/datasets/classified-ndvi-image-for-flood-damage-assessment>

The data is available under creative common license and hence freely available for use.
