

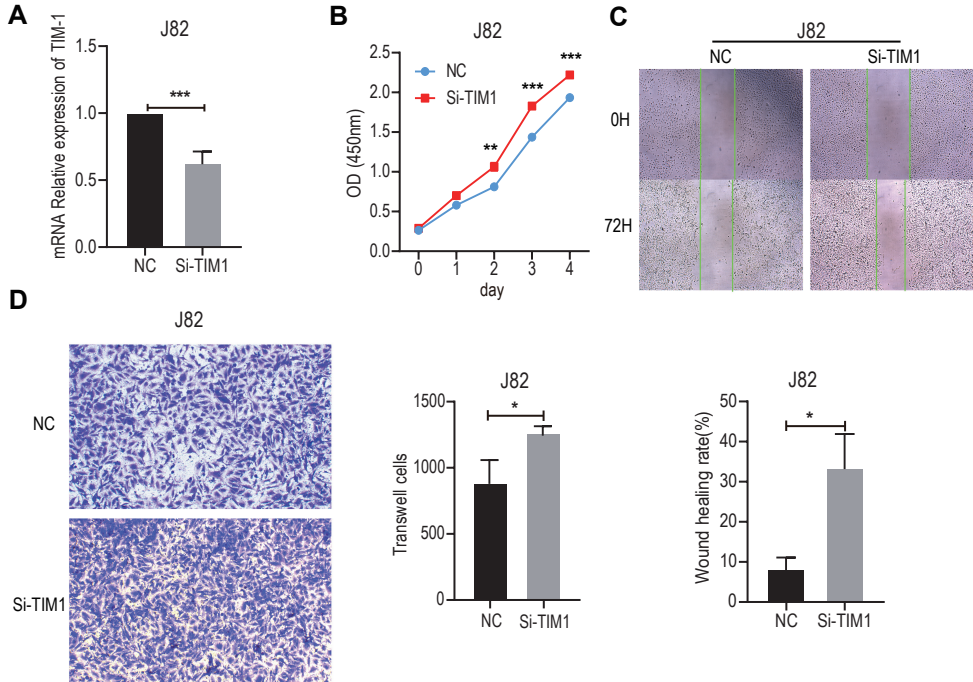

Figure S1. TIM-1 knockdown promoted J82 cell proliferation and migration. (A) The TIM-1 knockdown efficiency was measured by qRT-PCR. (B) TIM-1 knockdown promoted BC cell proliferation, as assessed by CCK8. (C) A wound healing assay was performed in Si-NC and Si-TIM1 J82 cells. (D) Transwell assays were performed in Si-NC and Si-TIM1 J82 cells. (* $P < 0.05$, ** $P < 0.01$, *** $P < 0.001$)
