

A**B****C****D**

Figure S2 (A) Transwell assays were performed in BC cells treated with different concentrations of IFN-α. (B) Efficiency of TIM-1 overexpression, detected by flow cytometry. (C) Flow cytometry shows the percentage of dead cells over total cells. (D) The expression of IFIT genes was measured by qRT-PCR in BC cells treated with different concentrations of IFN-α. (**P < 0.01, ***P < 0.001, ****P < 0.0001)
