

Suppl. Fig. 5: Location of significant QTL for total tuber fresh weight in the different StCDF1 cohorts: a) 1.1/1.1 cohort, b) 1.2/1.1 cohort, c) -/1.3 cohort. The X axis represents physical position (Mb), the Y axis represents $-\log_{10}(\text{p-value})$ and threshold of significance is indicated by the black dashed line. Clone C data are displayed in orange and clone E in blue.
