

Figure 1. Metabolic analysis and IP3R1 expression of C57BL/6 mice on chow diet (CD) or high-fat diet (HFD).

A

Figure 2. *Ip3r1* deletion in skeletal muscle leads to lower muscle weight.

F

Figure 2. *Ip3r1* deletion in skeletal muscle leads to lower muscle weight.

A

Figure 7. *Ip3r1*^{FKO} mice showed activated AMPK signaling in white adipose tissues.

D

Figure 7. *Ip3r1^{FKO}* mice showed activated AMPK signaling in white adipose tissues.

C

Figure S1. Metabolic analysis of WT and *Ip3r1*^{MKO} mice maintained on high fat diet.

E

Figure S1. Metabolic analysis of WT and *Ip3r1*^{MKO} mice maintained on high fat diet.
