

Supplementary Figure S2. Examples of video results of PFL-SD for (a) snoring (Supplementary File S3) and (b) stridor (Supplementary File S4) subjects. When the video is played with the video player, the bar moves every second and shows the diagnosis results of the proposed PFL-SD along with the audio source.

Figure S2

(a) Supplementary File S3 (44,100 Hz, 18:57)

(b) Supplementary File S4 (44,100 Hz, 40:52)

— No ROI
 — Predicted as snoring
 — Predicted as stridor
