

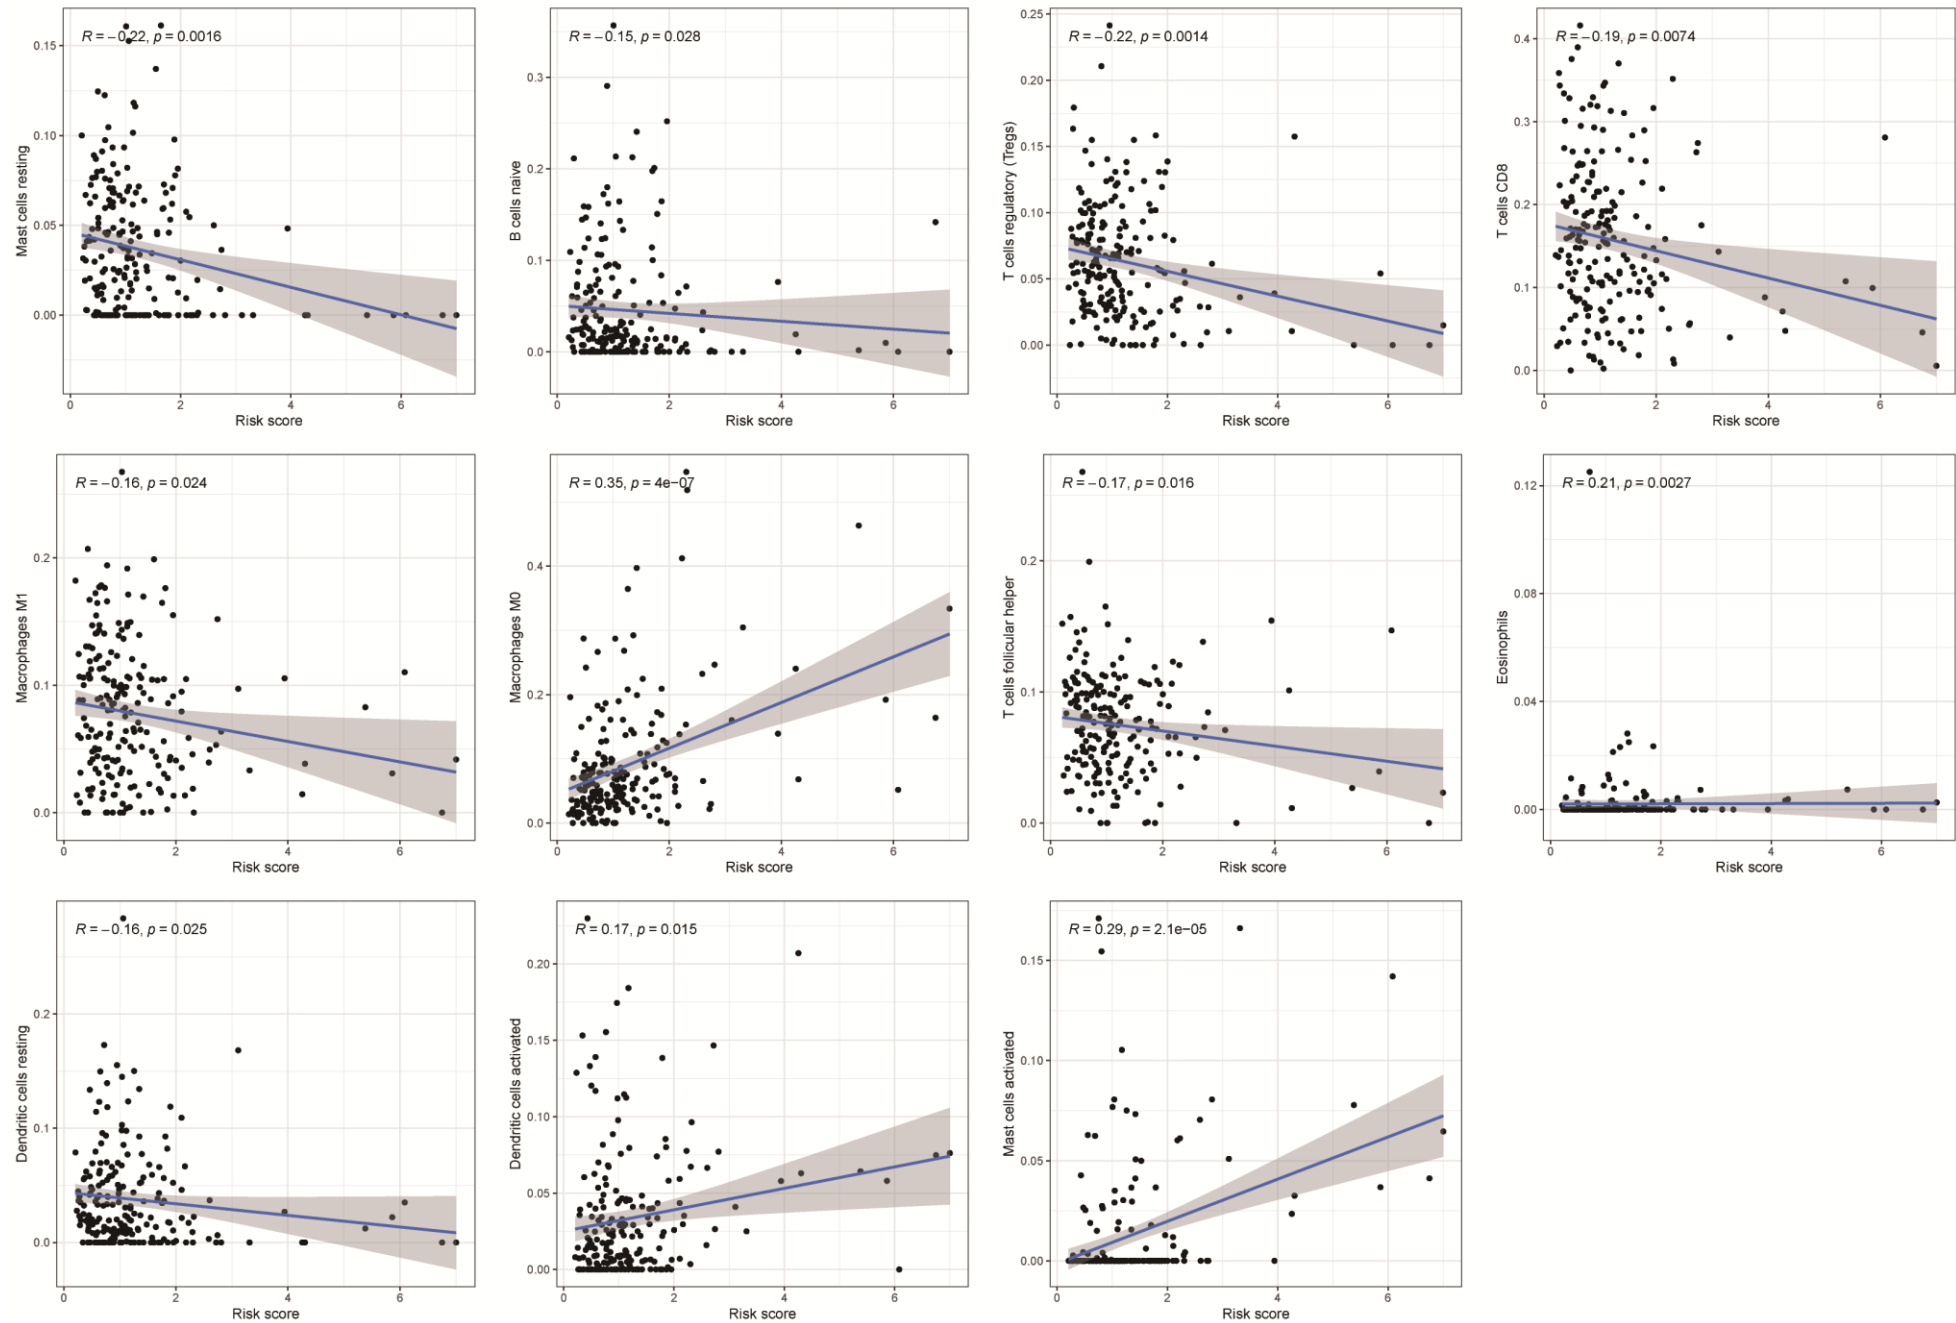

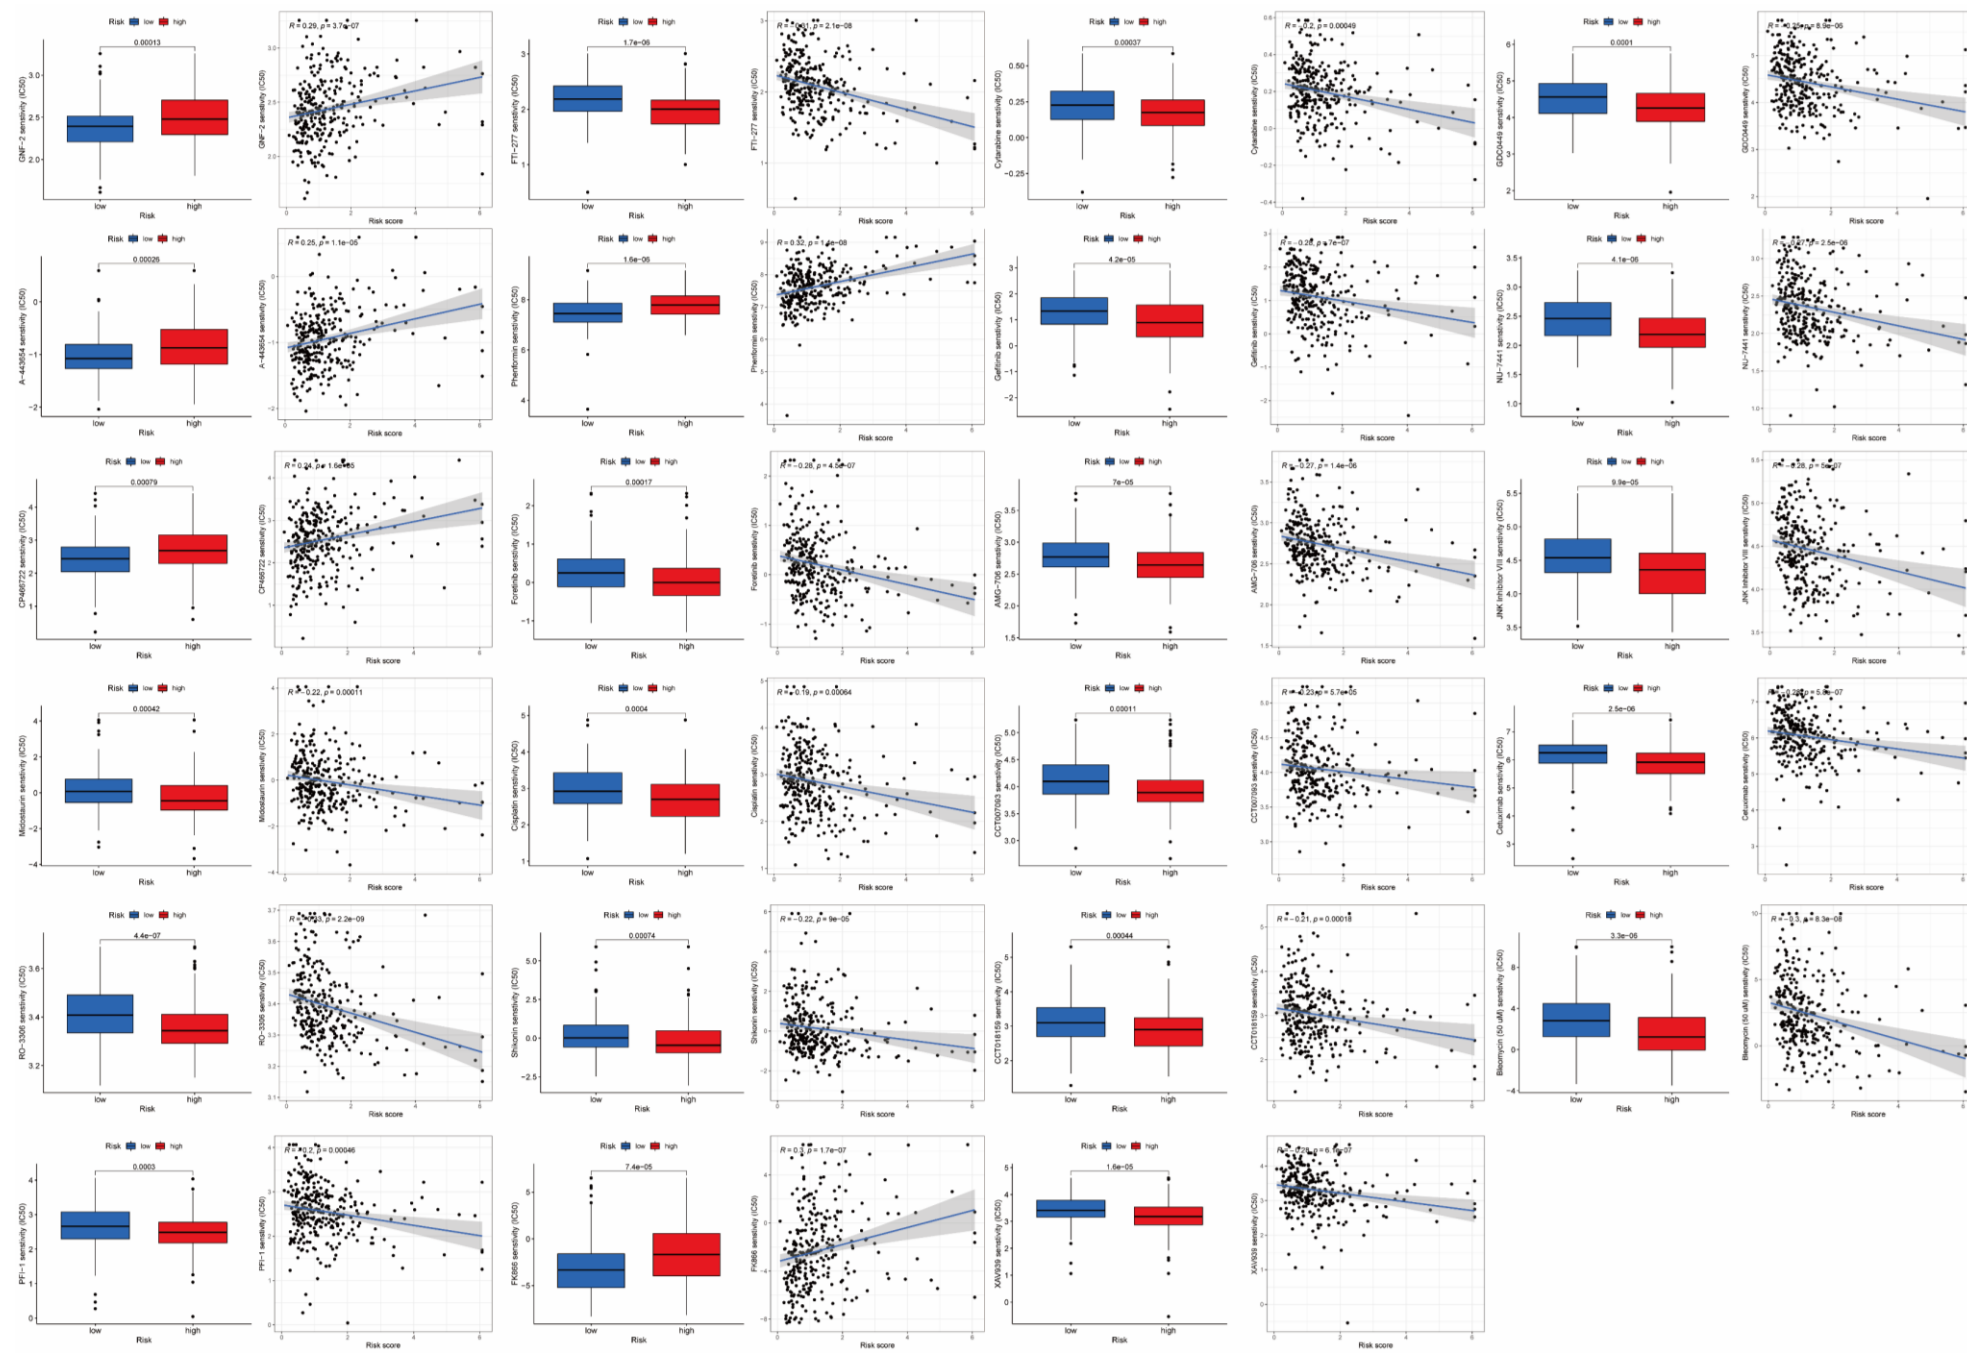

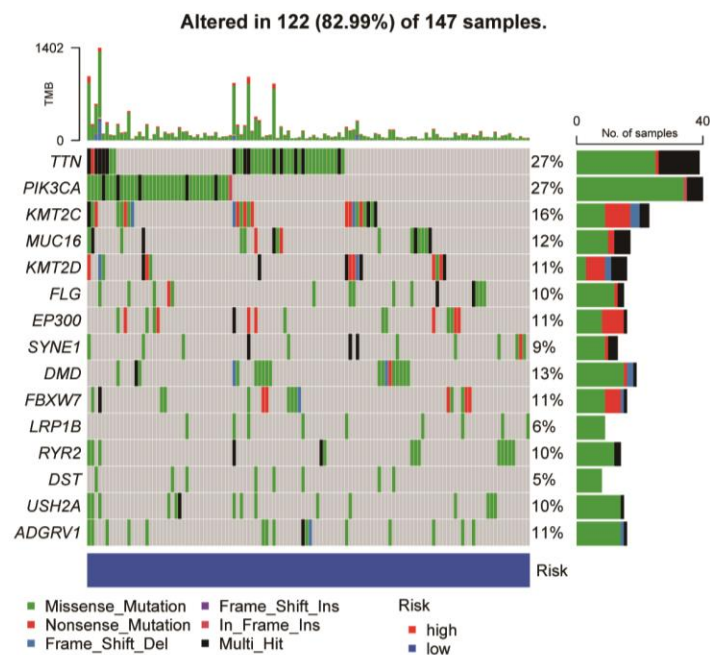

**Figure S1** Cuproptosis-related immune cells in the tumor microenvironment in CESC (additional).

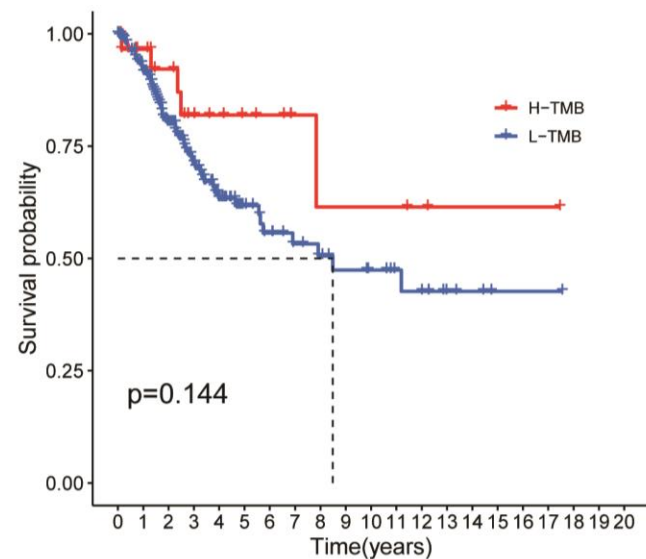

**Figure S2** Cuproptosis-related drug susceptibility (additional).

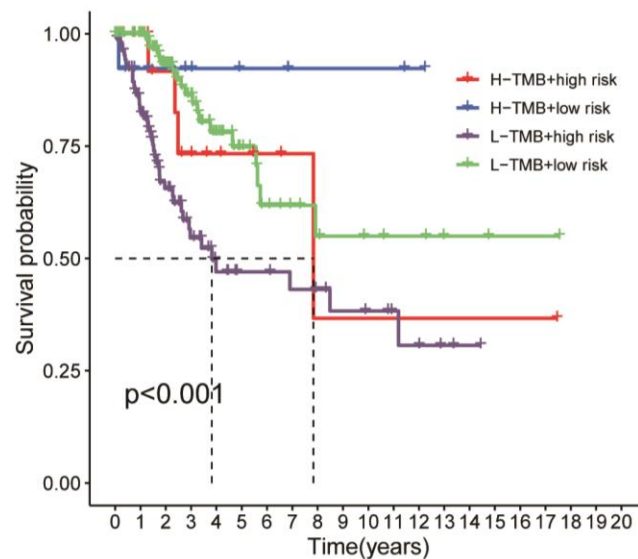

A

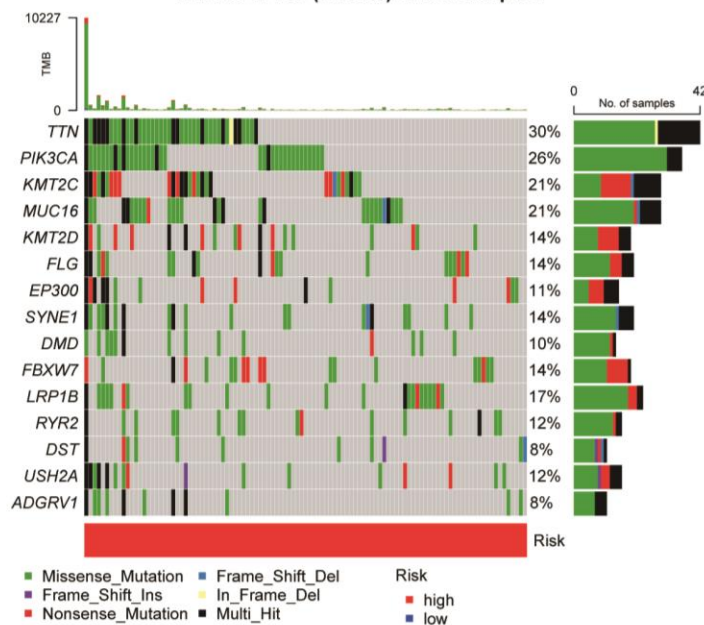

B

C

Altered in 107 (77.54%) of 138 samples.

**Figure S3** Differences in TMB between high- and low-risk subgroups.

(A) TMB expression in high and low risk groups.

(B) OS survival curves for patients in high and low TMB groups.

(C) OS survival curves of patients combining high and low TMB groups with high and low risk groups.
