

Table A3 ICU length of stay and hospital length of stay for surviving patients.

Variable	Algorithm (n = 92)	SoC (n = 175)	Total (n = 267)
ICU length of stay, mean (std), days	4.3 (5.4)	4.1 (7.0)	4.2 (6.5)
ICU length of stay, median (IQR), days	2.5 (0.9 - 5.4)	1.8 (1.0 - 3.5)	1.9 (1.0 - 4.3)
Hospital length of stay, mean (std), days	24.5 (25.4)	21.6 (19.9)	22.7 (22.0)
Hospital length of stay, median (IQR), days	17.1 (9.5 - 28.6)	13.8 (8.4 - 30.2)	15.0 (8.5 - 29.5)

n = Number of patients
Std = Standard deviation
IQR = Interquartile range, first to third quartile
NOTE: Length of stay truncated at investigation closure for three subjects still hospitalized at the end of the investigation

Figure A1 Probability of being discharged from the ICU or hospital at or before a certain time point, taking the competing risk of death into account (cumulative incidence function).
