

Table A1 Performance metrics for algorithm predicting sepsis 3 hours in advance, patients with Covid-19 diagnosis.

Metric	n	Value (95% CI)
Accuracy	11	0.82 (0.59 - 1.05)
Sensitivity	9	0.78 (0.51 - 1.00)
Specificity	2	1.00 (1.00 - 1.00)

n = Number of patients
CI = Confidende Interval
