

## **Supplementary Figure Legends**

**Supplementary Fig. 1** A strong correlation is observed between days to viral clearance and in hospital days for COVID-19 patients. The scatter plots for the correlation between SARS-CoV-2 RNA positive days and In-hospital days in all **(a)**, pneumonia **(b)** or severe pneumonia **(c)** patients, using Spearman's Rank-Order correlation. Values for  $R$  and  $p$  are included.
