

Table S1 Mapping ratios of RNA-seq sequences of the first to the sixth leaves

Table S2 Differently expressed genes of the first to the sixth leaves

Table S3 K-means clusters of the first to the sixth leaves

Table S4 GO enrichment analysis of K-means clusters

Table S5 RNA-seq clean reads between the first and the third leaves

Table S6 DEGs between the first and the third leaves

Table S7 ATAC-seq clean reads between the first and the third leaves

Table S8 Gain DARs between the first and the third leaves

Table S9 Loss DARs between the first and the third leaves

Table S10 DEGs with differentially accessible promoter regions between the first and the third leaves

Table S11 TFs in DEGs with differentially accessible promoter regions between the first and the third leaves

Table S12 Go enrichment analysis of DEGs with differentially accessible promoter regions

Table S13 Motif enrichment of DEGs with differentially accessible promoter regions
