Editor-in-Chief of "Boundary Value Problems"

We wish to submit an original research article entitled

"New refinements of the Hermite–Hadamard inequalities based on ψ -Hilfer
fractional integrals"

by "Hüseyin BUDAK, Umut BAS, Hasan KARA, Mohammad Esmael Samei".

We confirm that this work is original and has not been published elsewhere, nor it is currently under consideration for publication elsewhere. This article presents the above and below bounds for Midpoint type and Trapezoid type inequalities for ψ -Hilfer fractional integrals with the assistance of the functions whose second derivatives are bounded. We also possess some extensions and generalizations of Hermite–Hadamard inequalities via ψ -Hilfer fractional integrals with the aid of the functions that have the conditions that will said.

We have no conflicts of interest to disclose.

Dear reviewer's are suggested:

1) Reviewer 1:

- Prof. Shahram Rezapour (e-mail: rezapourshahram@yahoo.ca, Sh.rezapour@azaruniv.ac.ir)
