

Creyton Barreto de Moraes Ferreira is a student of the Bachelor's Degree in Computer Engineering at CEFET/RJ (*Campus* Petrópolis). He has experience in the area of Computer Science, with emphasis on Computer Networks. He works mainly on the following topics: energy conservation in Wireless Sensor Networks, Wireless Body Area Networks and DTN.

Thiago Barral Fernandes Reis holds a degree in Chemical Engineering from the Federal University of Rio de Janeiro (2012) and a specialization in Oil and Natural Gas Engineering from the Fluminense Federal University (2016). He has experience in the field of Chemical Engineering and Data Science. He is currently a Master's student at the Graduate Program in Computer Science (PPCIC) at CEFET/RJ.

Michel Pompeu Tcheou holds a degree in Electronic Engineering from the Federal University of Rio de Janeiro (2002), a master's and doctorate in Electrical Engineering from the Federal University of Rio de Janeiro (2005 and 2011, respectively). He worked as a researcher at the Electric Energy Research Center (Eletrobras-Cepel) from 2006 to 2011. Since 2012, he has been a professor at the Department of Electronics and Telecommunications at the State University of Rio de Janeiro. In addition, he is part of the faculty of the Graduate Program in Electronic Engineering (PEL). He has experience in Electrical Engineering, with emphasis on Telecommunications, Signal Processing, Signal Compression and Numerical Optimization Methods.

Raphael Melo Guedes received the Telecommunications Engineer degree from the State University of Rio de Janeiro (UERJ) in 2006 and the M.Sc. and D.Sc. degrees in Electrical Engineering from the Federal University of Rio de Janeiro (UFRJ) in 2009 and 2015, respectively. He is currently an adjunct professor at the State University of Rio de Janeiro. His research interests are in wireless networks, cognitive radios, heterogeneous networks and 6G technologies.

Laura Silva de Assis holds a bachelor's degree in Computer Science (2007), Master (2009) and PhD (2014) in Electrical Engineering from the State University of Campinas. She is currently a professor of Computer Engineering at the Federal Education Center Technology (CEFET/RJ), Brazil. Your interests of research are Operations Research, Combinatorial and Multiobjective Optimization, Bioinspired Computing, Reliability in Power Networks, Complex Networks, and Sensor Networks.

Felipe da Rocha Henriques holds a degree in Electrical Engineering with Emphasis in Telecommunications from the State University of Rio de Janeiro (2006), a Master's Degree in Electronic Engineering from the State University of Rio de Janeiro (2010) and a PhD in Electrical Engineering from the Federal University of Rio de Janeiro (2015). Has experience in Electrical Engineering, with emphasis on Telecommunications Systems, Signal Processing and Computer Networks. He is currently the Director of UnED Petrópolis at CEFET/RJ, where he works as an EBT professor in the Technical Course in Telecommunications Integrated into High School and in the Computer Engineering course. In addition, he also works in the Graduate Program in Computer Science (PPCIC) and in the Graduate Program in Instrumentation and Applied Optics (PPGIO) at CEFET/RJ. In 2019, he participated in the team that coordinated the XXXVII Brazilian Symposium on Telecommunications and Signal Processing (SBRT 2019), in the city of Petrópolis/RJ. He works mainly on the following topics: energy conservation in Wireless Sensor Networks, Zigbee Networks, Wireless Body Sensor Networks, Sparse Representations and Compressive Sampling, and Adaptive Filtering.
